Connecting Grammaticalisation Studies In Functional And Structural Linguistics:

Connecting Grammaticalisation Jens Nørgård-Sørensen, Lars Heltoft, Lene Schøsler, 2011 Grammar is seen as a complex sign system and as a consequence grammatical change always comprises semantic change The book introduces the concept of connecting grammaticalisation to describe the formation restructuring and dismantling of such complex paradigms It offers a broad general discussion of theoretical issues and three case studies

Diachronic Construction Grammar Jóhanna Barðdal, Elena Smirnova, Lotte Sommerer, Spike Gildea, 2015-07-15 Construction Grammar as a framework offers a new perspective on traditional historical questions in diachronic linguistics and language change how do new constructions arise how should competition in diachronic variation be accounted for how do constructions fall into disuse and how do constructions change in general formally and or semantically and with what implications for the language system as a whole This volume offers a broad introduction to the confluence of Construction Grammar and historical syntax and also detailed case studies of various instances of syntactic change modeled within Construction Grammar The volume demonstrates that Construction Grammar as a theory is particularly well suited for modeling historical changes in morphosyntax and it also documents challenging new phenomena that require a theoretical account within any competing framework of syntactic change

Exaptation and Language Change Muriel Norde, Freek Van de Velde, 2016-02-24 This volume is the first collection of papers that is exclusively dedicated to the concept of exaptation a notion from evolutionary biology that was famously introduced into linguistics by Roger Lass in 1990 The past quarter century has seen a heated debate on the properties of linguistic exaptation its demarcation from other processes of linguistic change and indeed the question of whether it is a useful concept in historical linguistics at all The contributions in the present volume reflect these diverging points of view Along with a comprehensive introduction covering the history of the notion of exaptation from its conception in the field of biology to its adoption in linguistics the book offers extensive discussion of the concept from various theoretical perspectives detailed case studies as well as critical reviews of some stock examples The book will be of interest to scholars working in the fields of evolutionary linguistics historical linguistics and the history of linguistics

World Lexicon of Grammaticalization Tania Kouteva, Bernd Heine, Bo Hong, 2019-08-08 Based on analysis of more than 1 000 languages this volume reconstructs more than 500 processes of grammatical change in the languages of the world

Paradigms regained: Theoretical and empirical arguments for the reassessment of the notion of paradigm Gabriele Diewald, Katja Politt, 2022 The volume discusses the breadth of applications for an extended notion of paradigm Paradigms in this sense are not only tools of morphological description but constitute the inherent structure of grammar Grammatical paradigms are structural sets forming holistic semiotic structures with an informational value of their own We argue that as such paradigms are a part of speaker knowledge and provide necessary structuring for grammaticalization processes The papers discuss theoretical as well as conceptual questions and explore different domains of grammatical phenomena ranging

from grammaticalization morphology and cognitive semantics to modality aiming to illustrate what the concept of grammatical paradigms can and cannot yet explain

Indexicality Peter Juul Nielsen, María Sol Sansiñena, 2024-06-04 The book offers the first full scale focused treatment of linguistic indexicality as a tool for analysis and explanation of the organization of linguistic structures The book demonstrates the application of the concept of indexicality in the description of a broad range of linguistic phenomena from the internal workings of morphology via relations within syntactic constructions to lexical and grammatical elements designed to hook on to features outside the clause in the interactional context The book offers a focused treatment of the general nature of linguistic indexicality in the larger perspective of the semiotics of language including examinations of domain straddling indexical functions It presents studies of the role of indexicality in synchrony and diachrony with descriptive cases from a number of languages from diverse language families and it examines the way indexicality enters into the mechanisms of change including examinations of semiotic shifts from indexical to symbolic function and vice versa The book is relevant for researchers and students in historical and synchronic linguistics from a variety of linguistic frameworks with an interest in the role of semiotics in linguistic analysis

Deixis and Pronouns in Romance Languages Kirsten Jeppesen Kragh, Jan Lindschouw, 2013-11-14 This volume proposes a new way to address the classical question concerning the relation between language cognition and culture from the perspective of two basic systems deixis and the pronominal system It investigates the linguistic structuring of basic concepts of person place and time in Romance languages disclosing structural differences that may be related to mental parameters and other extra linguistic circumstances and thus possibly linked to a light revision of the Sapir Whorf hypothesis The methodological and theoretical focus is based on the discursive and pragmatic functional approach to deixis The articles concern linguistic variation and language change and most of the studies adopt cross linguistic perspectives primarily among Romance languages but also with a classical perspective from Ancient Greek discussing the existence of universal categorical patterns The studies reveal similarities and differences between Romance languages mutually and set the stage for comparisons between Romance and non Romance languages These similarities and differences are subject to change in connection with cultural developments in society and offer in this volume a coordinated effort in exploring the linguistic expressions of these extra linguistic concepts

Linguistic Meaning Meets Linguistic Form Patrick Duffley, 2020-10-14 This book steers a middle course between two opposing conceptions that currently dominate the field of semantics the logical and cognitive approaches Patrick Duffley brings to light the inadequacies of both of these frameworks arguing that linguistic semantics must be based on the linguistic sign itself and on the meaning that it conveys across the full range of its uses The book offers 12 case studies that demonstrate the explanatory power of a sign based semantics dealing with topics such as complementation with aspectual and causative verbs control and raising wh words full verb inversion and existential there constructions It calls for a radical revision of the semantics pragmatics interface proposing that the dividing line be drawn

between content that is linguistically encoded and content that is not encoded but still communicated While traditional linguistic analysis often places meaning at the level of the sentence or construction this volume argues that meaning belongs at the lower level of linguistic items where the linguistic sign is stored in a stable permanent and direct relation with its meaning outside of any particular context Building linguistic analysis from the ground up in this way provides it with a more solid foundation and increases its explanatory power

New Directions in Grammaticalization Research Andrew D.M. Smith, Graeme Trousdale, Richard Wälchli, 2015-04-08 The articles in this volume examine a number of critical issues in grammaticalization studies including the relationship between grammaticalization and pragmaticalization subjectification and intersubjectification and grammaticalization and language contact The contributions consider data from a broad range of spoken and signed languages including Greek Japanese Nigerian Pidgin Swedish and Turkish Sign Language The authors work in a variety of theoretical frameworks and draw on a number of research traditions The volume will be of primary interest to historical linguists though the diversity of approaches and sources of data mean that the volume is also likely have considerable general appeal

Studies in Historical Linguistics and Language Change. Grammaticalization, Refunctionalization and Beyond Dorien Nieuwenhuijsen, Mar Garachana, 2019-10-23 The present volume examines the usefulness of a particular set of concepts and processes of change studying their applicability to a range of linguistic changes in Spanish and Latin that cannot be easily or can only be partially accounted for within the framework of grammaticalization Rather than challenging the insights of grammaticalization theory the different contributions to this monograph demonstrate that exaptation capitalization refunctionalization and adfunctionalization as well as changes motivated by rhetorical guidelines constitute interesting and valuable notions that allow for a better understanding of specific language changes in Spanish and by extension of language change in general
