Confessions Of A One Eyed Neurosurgeon:

Confessions of a One-Eyed Neurosurgeon James Salmon, M.D., Frank Salmon, 2009-04-17 Why is a Methodist minister doing stand up comedy while leading his slightly inebriated patrons in prayer Is it possible to have more than five successful careers in your lifetime Yes you can if you are Reverend Dr James H Salmon M D FACS CPA Dr Salmon tells all in his memoirs Now retired from his many lifetime endeavors the author has written an irreverent fascinating and truly humorous book that entertains educates and delights through little triumphs and big tragedies *Confessions* Simon Mayo, 2011-10-13 Simon Mayo first opened his confessional in 1988 on BBC Radio 1 s Breakfast Show Every day one shamefaced listener would share their deepest darkest secret while millions tuned in to find out whether or not Simon would grant his forgiveness Over twenty years later Simon presents the daily Drivetime show on BBC Radio 2 and the confessions segment is back Now those guilty listeners who missed their chance first time round have joined a whole new generation of sinners to beg for clemency from Father Mayo and his flock From supermarket wrecking games of aisle catch to kidnapped pensioners and clandestine pet vasectomies this is a brand new collection of hilarious letters and emails from Simon s ever popular show Join the discussion on Twitter drivetimeconfessions *Blue Ice* John U. Bacon, 2001 The games coaches and players of the University of Michigan s storied hockey program **Gray Matter** David I. Levy, Joel Kilpatrick, 2011 A perfect blend of medical drama and spiritual insight Gray Matter is a fascinating account of Dr David Levy s decision to begin asking his patients if he could pray for them before surgery His musings on what successful and unsuccessful surgical results imply about God faith and the power of prayer are honest and insightful *Memoirs of a Neurosurgeon* James D. Geissinger, 2012-02 In reflecting upon my life as a neurosurgeon perhaps the most salient feature is that period of history involved Trained by men who studied under Harvey Cushing considered the father of neurological surgery we as early third generation neurosurgeons were held to those rigid standards of academic achievement and physical endurance typical of that time The reader first identifies with the young child who dreams of becoming a doctor and then sets out on that long path He then re lives the experiences of the student of medicine and later the rigorous demands placed upon the surgeon in training During the later descriptions of the private practice of brain and spinal surgery the book transitions into an educational experience It presents to the reader a multitude of neurological disorders requiring surgical treatment the relevant surgical anatomy and the operative techniques involved Often interjected are the intangibles of surgical judgment and philosophy when confronting those in pain or critically ill Of equal importance were the major scientific advancements which occurred during that period of medical history No longer did we have to bore a hole in the skull or inject noxious materials into the head or spinal canal to verify a diagnosis Rather we had been privileged to enjoy the development of such remarkable machines as the ultrasound CAT and MRI Descriptions of these devices among others and their impact on medical practice should prove interesting to the inquisitive reader After 21 years in practice and probably at the height of my career as a surgeon I contracted hepatitis B

subsequent to an accidental needle puncture in the operating room Forced to lay down the scalpel I turned to my second childhood dream cattle ranching as an alternative vocation This then becomes a secondary focus of the book A medical colleague after learning of my book expressed an interest in learning the common denominator driving a man to both neurosurgery and ranching One can summarize with the word counterpoise I had always strived to achieve a balance between the in hospital academic precision oriented work of the neurosurgeon and the outdoor physically demanding life of a rancher consummating the total American dream Analogous to surgery I have always enjoyed using my hands in the shop Throughout the book sections have been devoted to various aspects of woodworking and an effort not only to share my enthusiasm but also to expose underlying problems and pitfalls challenges I have encountered in striving to become an artisan of fine furniture The practice of medicine has undergone significant change during my lifetime Not only have I witnessed a burgeoning unsustainable increase in the cost of healthcare but also major changes in the way in which medicine is being practiced in the new millennium Having been a proud product of the Lucky Few generation born between the years 1929 and 1945 I am rightfully able to compare today s practice of medicine with those of the latter half of the 20th century
