Conflict Prevention Path To Peace Or Grand Illusion Foundations Of Peace:

Conflict Prevention David Carment, Albrecht Schnabel, 2003 *Conflict Prevention* evaluates the institutional record on conflict prevention identifies current trends in conflict prevention practice and makes recommendations on improving organizational capacity This volume brings together a diverse group of individuals involved in conflict prevention activities scholars from developed and developing countries and practitioners with insights on the work of regional organizations and the United Nations The first part of the book addresses the question What is successful conflict prevention The distinctive answers to this question reflect an understanding of conflict prevention that is both analytically rigorous and useful to practitioners Conflict prevention can be understood as an important but understated element of statecraft and coercive diplomacy as the physical presence of a deterrent force or as a rehabilitative action taken to prevent the re emergence of violence Collectively these interpretations point to the malleability of conflict prevention as a theory and as a policy Contributors to the second part of the volume reflect on how existing mechanisms and instruments for conflict prevention can be properly evaluated and improved They focus on several institutions that are at the forefront of conflict prevention policy the EU the OSCE NATO and the UN They further show how informational and analytical needs can be used to enhance the quality of conflict analysis and its policy relevance Drawing on experiences in Africa and the Americas *Conflict Prevention* concludes with reflections on the efforts and challenges of building regional capacity in the developing world

Does Development Aid Affect Conflict Ripeness? Lucie Podszun, 2011-08-27 Many developing countries find themselves in seemingly intractable internal conflicts hindering them from moving on into a more stable secure and wealthy environment It seems that underdevelopment and conflict go hand in hand Underdevelopment most often implies large streams of development aid channeled into countries at war The work evaluates to what extent an increase in development aid affects conflict ripeness The research shows that the effect is ambivalent it depends on the conditions of provision whether it is positive or negative In general an increase in development aid decreases the intensity of one of the ingredients to conflict ripeness the mutually hurting stalemate However if embedded into a smart strategy an increase in development aid enhances the second ingredient to conflict ripeness the sense of a way out By that it counterbalances the negative effect and thus fosters the phase of ripeness creating an ideal starting position for a subsequent peace process
