Salthouse, 1991 First Published in 1991 Routledge is an imprint of Taylor Francis an informa company *Handbook of Psychology and Diabetes* Clare Bradley, 1994 This Handbook fulfils a pressing need within the area of psychological measurement in diabetes research and practice by providing access to material which has either been widely dispersed through the psychological and medical literature or has not previously been published Journal articles describing the psychometric development of scales have rarely included the scales themselves but this book includes copies of scales and a wealth of additional information from unpublished theses reports and recent manuscripts You will find information about the reliability validity scoring norms and use of the measures in previous research presented in one volume The Handbook is designed to help researchers and clinicians To select scales suitable for their purposes To administer and score the scales correctly To interpret the results appropriately Dr Clare Bradley is Reader in Health Psychology and Director of the Diabetes Research Group at Royal Holloway University of London Dr Bradley and her research group have designed developed and used a wide variety of measures of psychological processes and outcomes Many of these measures have been designed and developed specifically for people with diabetes Together with diabetes specific psychological measures developed by other researchers internationally these instruments have played an important part in facilitating patient centred approaches to diabetes research and clinical practice Digit Symbol Substitution Test Score and Hyperhomocysteinemia in Older Adults, 2016

Risk Assessment for Neurobehavioral Toxicity Bernard Weiss, Jürg Elsner, 1997-07 After three decades of research neurobehavioral toxicity is now acknowledged as a significant outcome of chemical exposure Its health and economic costs may exceed those by cancer by substantial amounts This new perspective has been accompanied by efforts designed to explore the responsible mechanisms to design applicable risk assessment procedures and to determine the consequent policy implications This publication includes 25 papers from international experts and includes human neurobehavioral toxicity animal behavioral methods selected model compounds and risk assessment **Cognitive Development in Adulthood** Mark L. Howe, Charles J. Brainerd, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the

Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series

Drug Discovery and Evaluation: Methods in Clinical Pharmacology
H.Gerhard Vogel,Jochen Maas,Alexander Gebauer,2010-12-15 Drug Discovery and Evaluation has become a more and more difficult expensive and time consuming process The effect of a new compound has to be detected by in vitro and in vivo methods of pharmacology The activity spectrum and the potency compared to existing drugs have to be determined As these processes can be divided up stepwise we have designed a book series Drug Discovery and Evaluation in the form of a recommendation document The methods to detect drug targets are described in the first volume of this series Pharmacological Assays comprising classical methods as well as new technologies Before going to man the most suitable compound has to be selected by pharmacokinetic studies and experiments in toxicology These preclinical methods are described in the second volume Safety and Pharmacokinetic Assays Only then are first studies in human beings allowed Special rules are established for Phase I studies Clinical pharmacokinetics are performed in parallel with human studies on tolerability and therapeutic effects Special studies according to various populations and different therapeutic indications are necessary These items are covered in the third volume **Methods in Clinical Pharmacology** **Novel treatment approaches and future directions in substance use disorders** Kenneth Michael Dürsteler,Marc Walter,Peter Blanken,2023-08-23
