Imagining Solar Energy Gregory Lynall, 2020-02-20
 Shortlisted for the 2022 ESSE Book Awards How has humanity sought to harness the power of the Sun and what roles have literature art and other cultural forms played in imagining mythologizing and reflecting the possibilities of solar energy What stories have been told about solar technologies and how have these narratives shaped developments in science and culture What can solar power's history tell us about its future within a world adapting to climate crisis Identifying the history of capturing solar radiance as a focal point between science and the imagination *Imagining Solar Energy* argues that the literary artistic and mythical resonances of solar power from the Renaissance to the present day have not only been inspired by but have also cultivated and sustained its scientific and technological development Ranging from Archimedes to Isaac Asimov John Dee to Humphry Davy Aphra Behn to J G Ballard the book argues that solar energy translates into many different kinds of power physical political intellectual and cultural and establishes for the first time the importance of solar energy to many literary and scientific endeavours

Invisible Philip Ball, 2015-04-08 A very fun largely chronological journey through invisibility beginning with myth and early magicians ending with quantum physics *The New Yorker* In this lively look at a timeless idea Ball provides the first comprehensive history of our fascination with the unseen This sweeping narrative moves from medieval spell books to the latest nanotechnology from fairy tales to telecommunications from camouflage to ghosts to the dawn of nuclear physics and the discovery of dark energy Along the way *Invisible* tells little known stories about medieval priests who blamed their misdeeds on spirits the Cock Lane ghost which intrigued both Samuel Johnson and Charles Dickens the attempts by Victorian scientist William Crookes to detect forces using tiny windmills novelist Edward Bulwer Lytton's belief that he was unseen when in his dressing gown and military efforts to enlist magicians to hide tanks and ships during WWII Bringing in such voices as Plato and Shakespeare Ball provides not only a scientific history but a cultural one showing how our simultaneous desire for and suspicion of the invisible has fueled invention and the imagination for centuries In this unusual and clever book Ball shows that our fantasies about being unseen and seeing the unseen reveal surprising truths about who we are Full of insights drawn from a broad survey of history literature and philosophy wherever the invisible is being contemplated Ball is there to select the juiciest anecdotes He is a lucid witty and highly entertaining guide *The Globe and Mail* A tour de force history capped off with an animated discussion of H G Wells's novel *The Invisible Man* Publishers Weekly starred review

Systems Boston Architectural Center, 1970 *The First Lady of World War II* Shannon McKenna Schmidt, 2023-05-02 The first book to tell the full story of Eleanor Roosevelt's unprecedented and courageous trip to the Pacific Theater during World War II On August 27 1943 news broke in the United States that First Lady Eleanor Roosevelt was on the other side of the world A closely guarded secret she had left San Francisco aboard a military transport plane headed for the South Pacific to support and report the troops on WW2's front

lines Americans had believed she was secluded at home As Allied forces battled the Japanese for control of the region Eleanor was there on the frontlines spending five weeks traveling on a mission as First Lady of the United States to experience what our servicemen were experiencing and report back home The most remarkable journey any president's wife has ever made Washington Times Herald September 28 1943 Mrs Roosevelt's sudden appearance in New Zealand well deserves the attention it is receiving This is the farthest and most unexpected junket of a First Lady whose love of getting about is legendary Detroit Free Press August 28 1943 By a happy chance for Australia this famous lady's taste for getting about her habit of seeing for herself what is going on in the world and most of all her deep concern for the welfare of the fighting men of her beloved country have brought her on the longest journey of them all across the wide war clouded Pacific Sydney Morning Herald September 4 1943 No other U S mother had seen so much of the panorama of the war had been closer to the sweat and boredom the suffering Time October 4 1943 Unbelievable Graham Ward,2014-09-30 Why believe What kinds of things do people believe in How have they come to believe them And how does what they believe or disbelieve shape their lives and the meaning the world has for them For Graham Ward who is one of the most innovative writers on contemporary religion these questions are more than just academic They go to the heart not only of who but of what we are as human beings Over the last thirty years our understandings of mind and consciousness have changed in important ways through exciting new developments in neuroscience The author addresses this quantum shift by exploring the biology of believing He offers sustained reflection on perception cognition time emotional intelligence knowledge and sensation Though the truth of belief remains under increasing attack in a thoroughly secularised context Ward boldly argues that secularity is itself a form of believing Pointing to the places where prayer and dreams intersect this book offers a remarkable journey through philosophy theology and culture thereby revealing the true nature of the human condition *The Indescribable God* Barry D. Smith,2012-10-05 The God of classical Christian faith is radically transcendent utterly beyond understanding and words So if God is to be known it must be in the luminous darkness of unknowing Drawing on a wide range of primary sources biblical patristic and medieval Barry D Smith identifies and explores seven ways of expressing the otherness of God in classical Christian thinking By allowing historical theologians to speak for themselves he shows how an aversion to ontotheology long precedes postmodernism The book first lays out the Old Testament and New Testament foundations for subsequent Christian reflections on divine transcendence These were the teachings that the early church assumed and with the assistance of Greek philosophy further refined with their own set of apophatic conceptual tools The main focus of the book is a sevenfold exposition of that theological refinement Smith concludes by looking towards possible future theological developments within this apophatic tradition Drawing on the theological methodology of historic Christianity he indicates how a synthesis of the biblical teaching on the otherness of God with philosophical traditions other than those inherited from Greek philosophy is also possible
