Proceedings of the 2024 International Conference on Social Sciences and Educational Development (ICOSSED 2024) Peng Dou,Keying Zhang,2025-03-28 This is an open access book 2024 International Conference on Social Sciences and Educational Development ICSSSED 2024 will be held on on December 21 22 2024 in Cangzhou China ICSSSED 2024 aims to bring together scholars educators and policymakers to discuss the dynamic interplay between educational advancements and social sciences As our world faces unprecedented challenges and transformative changes the role of education in shaping societies becomes ever more critical The conference will delve into educational theories practical applications and innovative approaches ICSSSED 2024 focuses more explicitly on global trends and the digitization of education to explore how emerging technologies and innovations in teaching are addressing existing educational inequities and enhancing the learning experience in diverse contexts

The Social Science Encyclopedia Adam Kuper,Jessica Kuper,2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

Collective Emotions Christian von Scheve,Mikko Salmella,2014 Although collective emotions have a long tradition in scientific inquiry for instance in mass psychology and the sociology of rituals and social movements their importance for individuals and the social world has never been more obvious than in the past decades The Arab Spring revolution the Occupy Wall Street movement and mass gatherings at music festivals or mega sports events clearly show the impact collective emotions have both in terms of driving conflict and in uniting people But these examples only show the most obvious and evident forms of collective emotions Others are more subtle although less important shared moods emotional atmospheres and intergroup emotions are part and parcel of our social life Although these phenomena go hand in hand with any formation of sociality they are little understood Moreover there still is a large gap in our understanding of individual emotions on the one hand and collective emotional phenomena on the other hand This book presents a comprehensive overview of contemporary theories and research on collective emotions It spans several disciplines and brings together for the first time various strands of inquiry and up to date research in the study of collective emotions and related phenomena In

focusing on conceptual theoretical and methodological issues in collective emotion research the volume narrows the gap between the wealth of studies on individual emotions and inquiries into collective emotions The book catches up with a renewed interest into the collective dimensions of emotions and their close relatives for example emotional climates atmospheres communities and intergroup emotions This interest is propelled by a more general increase in research on the social and interpersonal aspects of emotion on the one hand and by trends in philosophy and cognitive science towards refined conceptual analyses of collective entities and the collective properties of cognition on the other hand The book includes sections on Conceptual Perspectives Collective Emotion in Face to Face Interactions The Social Relational Dimension of Collective Emotion The Social Consequences of Collective Emotions Group Based and Intergroup Emotion Rituals Movements and Social Organization and Collective Emotions in Online Social Systems Including contributions from psychologists philosophers sociologists and neuroscience this volume is a unique and valuable contribution to the affective sciences literature

Emotional Labor in the 21st Century Alicia Grandey, James Diefendorff, Deborah E. Rupp, 2013-05-07 This book reviews integrates and synthesizes research on emotional labor and emotion regulation conducted over the past 30 years The concept of emotional labor was first proposed by Dr Arlie Russell Hochschild 1983 who defined it as the management of feeling to create a publicly observable facial and bodily display p 7 for a wage A basic assumption of emotional labor theory is that many jobs e g customer service healthcare team based work management have interpersonal and thus emotional requirements and that well being and effectiveness in these jobs is determined in part by a person s ability to meet these requirements Since Hochschild s initial work psychologists sociologists and management scholars have developed distinct theoretical approaches aimed at expanding and elaborating upon Hochschild s core ideas Broadly speaking emotional labor is the study of how emotion regulation of oneself and others influences social dynamics at work which has implications for performance and well being in a wide range of occupations and organizational contexts This book offers researchers and practitioners a review of emotional labor theory and research that integrates the various perspectives into a coherent framework and proposes an agenda for future research on this increasingly relevant and important topic The book is divided into 5 main sections with the first section introducing and defining emotional labor as well as creating a framework for the rest of the book to follow The second section consists of chapters describing emotional labor theory at different levels of analysis including the event person dyad and group The third section illustrates the diversity of emotional labor in distinct occupational contexts customer service e g restaurant retail call centers and caring work The fourth section considers broader contextual influences organizational societal and cultural level factors that modify how and when emotional labor is done The final section presents a series of reflective essays from eminent scholars in the area of emotion and emotion regulation where they reflect upon the past present and future of emotion regulation at work

Human Extinction and the Pandemic Imaginary Christos Lynteris, 2019-09-19 This book develops an examination and critique of

human extinction as a result of the next pandemic and turns attention towards the role of pandemic catastrophe in the renegotiation of what it means to be human Nested in debates in anthropology philosophy social theory and global health the book argues that fear of and fascination with the next pandemic stem not so much from an anticipation of a biological extinction of the human species as from an expectation of the loss of mastery over human non human relations Christos Lynteris employs the notion of the pandemic imaginary in order to understand the way in which pandemic borne human extinction refashions our understanding of humanity and its place in the world The book challenges us to think how cosmological aesthetic ontological and political aspects of pandemic catastrophe are intertwined The chapters examine the vital entanglement of epidemiological studies popular culture modes of scientific visualisation and pandemic preparedness campaigns This volume will be relevant for scholars and advanced students of anthropology as well as global health and for many others interested in catastrophe the end of the world and the post apocalyptic

The Oxford Handbook of Credit Derivatives Alexander Lipton, Andrew Rennie, 2013-01-17 From the late 1990s the spectacular growth of a secondary market for credit through derivatives has been matched by the emergence of mathematical modelling analysing the credit risk embedded in these contracts This book aims to provide a broad and deep overview of this modelling covering statistical analysis and techniques modelling of default of both single and multiple entities counterparty risk Gaussian and non Gaussian modelling and securitisation Both reduced form and firm value models for the default of single entities are considered in detail with extensive discussion of both their theoretical underpinnings and practical usage in pricing and risk For multiple entity modelling the now notorious Gaussian copula is discussed with analysis of its shortcomings as well as a wide range of alternative approaches including multivariate extensions to both firm value and reduced form models and continuous time Markov chains One important case of multiple entities modelling counterparty risk in credit derivatives is further explored in two dedicated chapters Alternative non Gaussian approaches to modelling are also discussed including extreme value theory and saddle point approximations to deal with tail risk Finally the recent growth in securitisation is covered including house price modelling and pricing models for asset backed CDOs The current credit crisis has brought modelling of the previously arcane credit markets into the public arena Lipton and Rennie with their excellent team of contributors provide a timely discussion of the mathematical modelling that underpins both credit derivatives and securitisation Though technical in nature the pros and cons of various approaches attempt to provide a balanced view of the role that mathematical modelling plays in the modern credit markets This book will appeal to students and researchers in statistics economics and finance as well as practitioners credit traders and quantitative analysts
