100 Contemporary Concrete Buildings Philip Jodidio, 2021-09 100 Contemporary Concrete Buildings Philip Jodidio, 2015 **Contemporary Concrete Buildings** Philip Jodidio, 2018 Once synonymous with eyesore highway bridges and crumbling unloved walls concrete has been reborn as adventurous and sexy This Bibliotheca Universalis edition considers the elaborate feats and prodigious engineering of contemporary concrete architecture from stars such as Tadao Ando and Herzog de Meuron to fresh new studios like the Russian SPEECH **Historical Dictionary of Architecture** Allison Lee Palmer, 2016-05-26 This dictionary provides a historical overview of the major architectural developments and styles building materials and types major structures and locations sites and architects Historical eras like ancient Egyptian architecture and the Renaissance in Europe and movements such as Art Deco are covered Materials discussed range from concrete stone glass and wood while types of structures include architectural inventions such as the arch and dome to building types from monasteries and mosques to museums and skyscrapers Major structures highlighted in this volume include not only great achievements such as Hagia Sophia and the Eiffel Tower but also important sites such as the Great Zimbabwe and Angkor Wat found on the UNESCO World Heritage Site list General geographical areas are also covered such as African and Russian architecture Noted architects include theorists from the ancient Chinese engineer Yu Hao Roman engineer Vitruvius to many current architects such as Zaha Hadid and Santiago Calatrava with a focus on architects who have enjoyed lasting fame through history or have won international prizes such as the Pritzker Architecture Prize This second edition of Historical Dictionary of Architecture contains a chronology an introduction and an extensive bibliography The dictionary section has over 400 cross referenced entries on architects famous structures types of materials and the different architectural styles This book is an excellent access point for students researchers and anyone wanting to know more about architecture **100 Bâtiments Contemporains en Béton** Philip Jodidio, 2015 Concrete That characterless stuff of parking lots or Communist tower blocks right Well yes And no Concrete is actually a name applied to a remarkably wide range of building substances and when properly handled is one of the noble materials of contemporary architecture A kind of liquid stone at the outset it is malleable durable and capable of prodigious feats of engineering This two volume book highlights the best work done in concrete of recent years It includes such stars as Zaha Hadid Herzog de Meuron and Steven Holl but also surprising new architects like the Russians SPEECH and rising stars of the international scene like Rudy Ricciotti from France as well as artists such as James Turrell who turned the famous concrete spiral of Frank Lloyd Wright's Guggenheim in New York into the setting of one of his most remarkable pieces Provided by publisher *Detail in Contemporary Concrete Architecture* David Phillips, 2012 **New Architecture and Technology** Gyula Sebestyen, Christopher Pollington, 2007-06-07 Many books have covered the topics of architecture materials and technology New Architecture and Technology is the first to explore the interrelation between these three subjects It illustrates the

impact of modern technology and materials on architecture The book explores the technical progress of building showing how developments both past and present are influenced by design methods It provides a survey of contemporary architecture as affected by construction technology It also explores aspects of building technology within the context of general industrial social and economic developments The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design *Introducing Architectural Tectonics* Chad

Schwartz,2016-10-04 *Introducing Architectural Tectonics* is an exploration of the poetics of construction Tectonic theory is an integrative philosophy examining the relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in eleven countries including Germany Italy United States Chile Japan Bangladesh Spain and Australia and designed by such notable architects as Tadao Ando Herzog de Meuron Kengo Kuma Olson Kundig and Peter Zumthor Although similarities do exist between the projects their distinctly different characteristics location and climate context size program construction methods and range of interpretations of tectonic expression provide the most significant lessons of the book helping you to understand tectonic theory Written in clear accessible language these investigations examine the poetic creation of architecture showing you lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office **Sacred Buildings** Rudolf Stegers,2008-05-16

The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality
