Music Collection Development and Management in the Digital Age Kirstin Dougan Johnson, 2023 Music Collection Development and Management in the Digital Age offers both a theoretical context and practical approaches to the issues facing today's music collection builders and managers. In this exciting new book, Kirstin Dougan Johnson engages readers with many of the core responsibilities involved with music collections in both music library and general library settings. The author examines the whole of music collections incorporating into that vision guidance on the principles and tasks involved with collection building, acquisitions, management and assessment. Details include music formats and publishing, music identification and discoverability, the context of music collections and the tasks involved in building and scoping them, diversity and inclusion in music collections, budgets and acquisitions workflows, pre and post order tasks, collection management and assessment, and future directions for collection development in music. With its focus on issues related to music scores and media in physical and electronic forms, *Music Collection Development and Management in the Digital Age* directly addresses subject librarians who select music materials in academic libraries. The volume also serves music librarians in other settings such as public and conservatory libraries. All in all, *Music Collection Development and Management in the Digital Age* is an essential reference for all who work with music collections, whether in music libraries specifically, general library collections with music holdings, or centralized library acquisitions departments. **Online**

Teaching and Learning in Higher Education Mariam Akinlolu, Manyane Makua, Nomalungelo Ngubane, 2024-06-03 This edited volume explores current practices in African higher education during and post the global pandemic. It fills a gap in the existing literature by focusing on student engagement and online learning in South Africa and examines how pandemic restrictions amplified pre-existing inequalities within the higher education sector. The book is divided into 3 sections. The first section discusses various methods of instruction and the use of online tools for facilitating learning, succeeded by a section focusing on the resource implications of moving to online learning platforms from a social justice perspective, and finally the last section considers issues and concerns about online assessments and quality assurance. Drawing on lessons from the experiences of South African educators and students during the pandemic, this book provides a knowledge base essential for the effective management of online teaching and learning in Africa. It is intended for academic stakeholders to develop and engender an improved higher education climate. **Digital Business and Electronic Commerce** Bernd W.

Wirtz, 2021-03-28 This textbook introduces readers to digital business from a management standpoint. It provides an overview of the foundations of digital business with basics, activities and success factors, and an analytical view on user behavior. Dedicated chapters on mobile and social media present fundamental aspects, discuss applications, and address key success factors. The Internet of Things (IoT) is subsequently introduced in the context of big data, cloud computing, and connecting technologies, with a focus on industry 4.0, smart business services, smart homes, and digital consumer applications, as well as

artificial intelligence The book then turns to digital business models in the B2C business to consumer and B2B business to business sectors Building on the business model concepts the book addresses digital business strategy discussing the strategic digital business environment and digital business value activity systems dVAs as well as strategy development in the context of digital business Special chapters explore the implications of strategy for digital marketing and digital procurement Lastly the book discusses the fundamentals of digital business technologies and security and provides an outline of digital business implementation A comprehensive case study on Google Alphabet explaining Google s organizational history its integrated business model and its market environment rounds out the book

Digital Preservation for Libraries, Archives, and Museums Edward M. Corrado, Heather Moulaison-Sandy, 2017-01-12 This new edition of Digital Preservation in Libraries Archives and Museums is the most current complete guide to digital preservation available today For administrators and practitioners alike the information in this book is presented readably focusing on management issues and best practices Although this book addresses technology it is not solely focused on technology After all technology changes and digital preservation is aimed for the long term This is not a how to book giving step by step processes for certain materials in a given kind of system Instead it addresses a broad group of resources that could be housed in any number of digital preservation systems Finally this book is about things not technology not how to not theory I wish I knew before I got started Digital preservation is concerned with the life cycle of the digital object in a robust and all inclusive way Many Europeans and some North Americans may refer to digital curation to mean the same thing taking digital preservation to be the very limited steps and processes needed to insure access over the long term The authors take digital preservation in the broadest sense of the term looking at all aspects of curating and preserving digital content for long term access The book is divided into four part 1 Situating Digital Preservation 2 Management Aspects 3 Technology Aspects and 4 Content Related Aspects Digital Preservation will answer questions that you might not have even known you had leading to more successful digital preservation initiatives
