Teaching Geography 11-18: a Conceptual Approach David Lambert, John Morgan, 2010-01-16 This is a must read for all 11 18 geography educators It argues for a new geography curriculum founded on a set of major concepts that are profoundly relevant to 21st century life For years books on 11 18 geography education have focussed on classroom techniques new pedagogic technologies and alternative modes of student assessment Not this one Teaching Geography 11 18 digs deep It asks not only what geography is for but bases its answer on a set of key concepts able to sustain an exciting and relevant curriculum It also grounds its many arguments in the latest geographical research thus re establishing the broken connection between geography teaching in schools and that in higher education Professor Noel Castree University of Manchester UK This engaging and stimulating book aims to radically re shape and sharpen debates in geography education by taking an entirely fresh approach to both the subject and its place in secondary education Key questions addressed in this book include What is the place of geography within the secondary school curriculum To what extent does school geography reflect and engage with contemporary issues and theories from the wider subject What are the issues challenges and opportunities of a concept led approach to teaching geography What are the implications of ICT media and technology for the future of geography teaching in schools Influenced by the revised national curriculum for geography which has reduced the prescribed content to be covered this book offers an objective view of the concept led approach The new focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail This book fills that void by examining geography's key concepts and providing teachers with a theoretically robust and practical approach to curriculum planning using a concept led approach This is essential reading for all secondary geography teachers trainee teachers and anyone involved with education and curriculum planning

shaping rural spaces A key objective of the book is to highlight how and to what extent rural regeneration policy and governance are responsive to an increasingly differentiated and uneven rural economy and society Part One considers the context for rural regeneration including theoretical frameworks of relevance and the ways in which rural regeneration policy and governance have been framed In particular it includes a consideration of how the rural has been made thinkable and the extent to which this has moved beyond traditional concerns with agricultural development Part Two highlights the key dimensions and spaces of rural regeneration This includes responses to rural change from within the rural including community led approaches the use of culture and the extent to which approaches may be converging or diverging within a devolved UK Rural Regeneration in the UK provides a comprehensive and integrated analysis of responses to rural change that will appeal to a broad audience of students scholars and practitioners both in the UK and abroad

what we want green belts to achieve and suggest alternative ways in which that could be done before looking forward to consider how things might change in the coming years This book draws together information from a range of sources to present for the first time a comprehensive study of green belts in the UK It reflects upon the gap between perception and reality about green belts analyses their impacts on rural and urban areas and questions why they retain such popular support and whether they are still the right solution for the UK and elsewhere It will be of interest to anyone who is concerned with planning and development and how we can provide the homes jobs and services we need while protecting our more valuable natural assets
