## **Contested Powers The Politics Of Energy And Development In Latin America:**

**Contested Powers** John-Andrew McNeish, Axel Borchgrevink, Owen Logan, 2015-06-11 In the global North the commoditization of creativity and knowledge under the banner of a creative economy is being posed as the post industrial answer to dependency on labour and natural resources Not only does it promise a more stable and sustainable future but an economy focused on intellectual property is more environmentally friendly so it is suggested Contested Powers argues that the fixes being offered by this model are bluffs development as witnessed in Latin American energy politics and governance remains hindered by a global division of labour and nature that puts the capacity for technological advancement in private hands The authors call for a multi layered understanding of sovereignty arguing that it holds the key to undermining rigid accounts of the relationship between carbon and democracy energy and development and energy and political expression Furthermore a critical focus on energy politics is crucial to wider debates on development and sustainability Contested Powers is essential reading for those wondering how energy resources are converted into political power and why we still value the energy we take from our surroundings more than the means of its extraction **Contested Powers** John-Andrew McNeish, Axel Borchgrevink, Owen Logan, A study of the relationship between energy production and political power

**Social-Environmental Conflicts, Extractivism and Human Rights in Latin America** Malayna Raftopoulos, 2018-12-07 This book focuses on the issues of global environmental injustice and human rights violations and explores the scope and limits of the potential of human rights to influence environmental justice It offers a multidisciplinary perspective on contemporary development discussions analysing some of the crucial challenges contradictions and promises within current environmental and human rights practices in Latin America The contributors examine how the extraction and exploitation of natural resources and the further commodification of nature have affected local communities in the region and how these policies have impacted on the promotion and protection of human rights as communities struggle to defend their rights and territories The book analyses the emergence of transnational activism in the context of collective action organised around socio environmental conflicts the infringement of basic human rights and the emergence of alternative and sometimes conflicting development models Furthermore it critically discusses why governments are often willing to override their commitments to sustainability and human rights to promote their development agenda The chapters originally published as a special issue in The International Journal of Human Rights **Sovereign Forces** John-Andrew McNeish, 2021-06-11 Sovereignty is a significant force regarding the ownership use protection and management of natural resources By placing an emphasis on the complex intertwined relationship between natural resources and diverse claims to resource sovereignty this book reveals the backstory of contemporary resource contestations in Latin America and their positioning within a more extensive history of extraction in the region Exploring cases of resource contestation in Bolivia Colombia and Guatemala Sovereign Forces highlights the value of these relationships to the practice of environmental

governance and peacebuilding in the region

### **The Regulation and Policy of Latin American Energy Transitions**

Lucas Noura Guimarães, 2020-02-19 The Regulation and Policy of Latin American Energy Transitions examines the ongoing revolution within the energy landscape of Latin America This book includes real world examples from across the continent to demonstrate the current landscape of energy policy in Latin America It focuses on distributed energy resources including distributed generation energy efficiency and microgrids but also addresses the role of less common energy sources such as geothermal and biogas as well as discusses the changing role of energy actors where consumers become prosumers or prosumagers and utilities become service providers The legal frameworks that are still hampering the transformation of the energy landscape are explored together with an analysis of the economic planning related and social aspects of energy transitions which can help address the issue of how inequalities are affecting and being affected by energy transitions The book is suitable for policy makers lawyers economists and social science professionals working with energy policy as well as researchers and industry professionals in the field It is an ideal source for anyone involved in energy policy and regulation across Latin America

### **The Intersection of Global Energy Politics and Climate Change**

Pardeep Singh, Bendangwapang Ao, 2025-02-13 This book provides an analysis of the concurrence of energy politics and global climate change The book starts with an explanation of what roles energy and climate change play in the correlation process and the anthropogenic activities that hamper the smooth functioning of their co existence The next part discusses the institutions and industries directly related to energy and climate change The third part focuses on energy economics and markets to understand the global drivers for economic development After that the book presents the world s energy demand due to globalization and the environmental cost involved followed by the part highlighting the importance of energy transitions and the extent to which the global political set up is engaged in catering to those transitions The sixth part of the book takes a comprehensive view of climate change mitigation strategies and carbon and ecological footprints followed by discussions of future scenarios for building a sustainable framework and forecasts of the resulting political and economic trends Finally the last part deals with the challenges faced during the convergence of energy politics and climate change The book is a valuable resource for early career researchers university teachers and professionals in think tanks

*The Social Life of Economic Inequalities in Contemporary Latin America* Margit Ystanes, Iselin Åsedotter Strønen, 2017-10-25 This book is open access under a CC BY 4.0 license This edited volume examines how economic processes have worked upon social lives and social realities in Latin America during the past decades Through tracing the effects of the neoliberal epoch into the era of the so called pink tide the book seeks to understand to what extent the turn to the left at the start of the millennium managed to challenge historically constituted configurations of inequality A central argument in the book is that in spite of economic reforms and social advances on a range of arenas the fundamental tenants of socio economic inequalities have not been challenged substantially As several countries are now experiencing a return to right wing politics this collection helps us

better understand why inequalities are so entrenched in the Latin American continent but also the complex and creative ways that it is continuously contested The book directs itself to students scholars and anyone interested in Latin America economic anthropology political anthropology left wing politics poverty and socio economic inequalities *Political Economies of Energy Transition* Kathryn Hochstetler,2020-11-26 Shows that economic concerns about jobs costs and consumption rather than climate change are likely to drive energy transition in developing countries **The Routledge Handbook on the History of Development** Corinna R. Unger,Iris Borowy,Corinne A. Pernet,2022-06-23 This bold and ambitious handbook is the first systematic overview of the history of development ideas themes and actors in the twentieth century Taking stock of the field the book reflects on blind spots points out avenues for future research and brings together a greater plurality of regions actors and approaches than other publications on the subject The book offers a critical reassessment of how historical experiences have shaped contemporary understandings of development demonstrating that the seemingly self evident concept of development has been contingent on a combination of material conditions power structures and policy choices at different times and in different places Using a world history approach the handbook highlights similarities in development challenges across time and space and it pays attention to the meanings of ideological cultural and economic divides in shaping different understandings and practices of development Taking a thematic approach the book shows how different actors governments non governmental organizations individuals corporations and international organizations have responded to concerns regarding the conditions in their own or other societies such as the provision of education health or food approaches to infrastructure development and industrialization the adjustment of social conditions population policies and migration and the maintenance of stability and security Bringing together a range of voices from across the globe this book will be perfect for advanced students and researchers of international development history **The Routledge Handbook of Indigenous Development** Katharina Ruckstuhl,Irma A. Velásquez Nimatuj,John-Andrew McNeish,Nancy Postero,2022-11-30 This Handbook inverts the lens on development asking what Indigenous communities across the globe hope and build for themselves In contrast to earlier writing on development this volume focuses on Indigenous peoples as inspiring theorists and potent political actors who resist the ongoing destruction of their livelihoods To foster their own visions of development they look from the present back to Indigenous pasts and forward to Indigenous futures Key questions How do Indigenous theories of justice sovereignty and relations between humans and non humans inform their understandings of development How have Indigenous people used Rights of Nature legal pluralism and global governance systems to push for their visions How do Indigenous relations with the Earth inform their struggles against natural resource extraction How have native peoples negotiated the dangers and benefits of capitalism to foster their own life projects How do Indigenous peoples in diaspora and in cities around the world contribute to Indigenous futures How can Indigenous intellectuals artists and scientists control their intellectual property and knowledge systems and bring into being meaningful

collective life projects The book is intended for Indigenous and non Indigenous activists communities scholars and students It provides a guide to current thinking across the disciplines that converge in the study of development including geography anthropology environmental studies development studies political science and Indigenous studies
