Mobile Phone Panel Surveys in Developing Countries Andrew Dabalen, Alvin Etang, Johannes Hoogeveen, Elvis Mushi, Youdi Schipper, Johannes von Engelhardt, 2016-07-12 Household survey data are very useful for monitoring living conditions of citizens of any country. In developing countries a lot of this data are collected through traditional face to face household surveys. Due to the remote and dispersed nature of many populations in developing countries but also because of the complex nature of many survey questionnaires collection of timely welfare data has often proved expensive and logistically challenging. Yet there is a need for faster cheaper to collect lighter more nimble data collection methods to address data gaps between big household surveys. The recent proliferation of mobile phone networks has opened new possibilities. By combining baseline data from a traditional household survey with subsequent interviews of selected respondents using mobile phones this facilitates welfare monitoring and opinion polling almost real time. The purpose of this handbook is to contribute to the development of the new field of mobile phone data collection in developing countries. The handbook documents how this innovative approach to data collection works its advantages and challenges. The handbook draws primarily from the authors first hand experiences with mobile phone surveys in Africa and also benefits from experiences elsewhere. It is intended to serve a diverse audience including those involved in collecting representative data using mobile phones and those using data collected through this approach. For those who will be implementing a mobile phone panel survey the different chapters guide them through every stage of the implementation process. For potential users of the data collected via mobile phone technology the handbook presents a new approach to data collection which they can use for monitoring programs and facilitate almost real time decision making. A further purpose of this book is to contribute to the debate regarding the advantages of the method as well as the challenges associated with it.
