Dampier's Voyages William Dampier, 1906 *Asia in the Making of Europe* Donald Frederick Lach, Edwin J. Van Kley, 1965 First systematic inclusive study of the impact of the high civilizations of Asia on the development of modern Western civilization **Lives and Voyages of Drake, Cavendish, and Dampier**, 1837 **Lives and Voyages of Drake, Cavendish, and Dampier** Francis Drake, 1849 *Bibliography of Books, Articles, and Pamphlets Dealing with Western Australia, Issued Since Its Discovery in 1616* Francis G. Steere, 1923 Section on Aboriginal inhabitants **Lives and Voyages of Drake, Cavendish, and Dampier** Christian Isobel Johnstone, 1837 **A Catalogue of Geography, Voyages, Travels, History of America, Africa, Australasia and Asia** Bernard Quaritch, Quaritch (Londres), 1899 *Bibliography of Natural History Travel Narratives* Anne S. Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work. He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences. The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna, flora and fossil remains. Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment. Fragmentary though they often are, these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth, providing us with a window on an ever changing and often vanishing natural world. Without such records of the past we could not track, document or understand the significance of changes that are so important for the study of zoogeography. With this book Troelstra gives us a superb overview of natural history travel narratives. The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions. While no subject bibliography by a single author can attain absolute completeness, Troelstra's work is comprehensive to a truly remarkable degree. The entries are arranged alphabetically by author and chronologically by the year of first publication under the author's name. A brief biography with the scope and range of their work is given for each author; every title is set in context; the contents, including illustrations, are described and all known editions and translations are cited. In addition, there is a geographical index that cross-refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography. **Science, Literature and Rhetoric in Early Modern England** Juliet Cummins, David Burchell, 2007 These essays throw new light on the complex relations between science, literature and rhetoric as avenues to discovery in early modern England. Analyzing the contributions of such diverse writers as Shakespeare, Bacon, Hobbes, Milton, Cavendish, Boyle, Pope and Behn to contemporary epistemological debates, these essays move us toward a better understanding of interactions between the sciences and the humanities during a seminal phase in the development of modern Western thought. **Sale Catalogues** American Art Association, Anderson Galleries (Firm), inc.
