

Control Language Programming for IBM i

Since its introduction, *Control Language Programming for the AS/400* has been an integral part of hundreds of AS/400 college courses. This textbook has been a boon to students who plan to initiate careers as AS/400 programming professionals, as well as a must-read reference for programmers already in the workplace.

Now Jim Buck, Bryan Meyers, and Dan Riehl have updated this classic text with the publication of *Control Language Programming for IBM i*. This new book builds upon the success of the original text, but brings it up to date with current releases of IBM i for Power Systems. The text covers all the basics as well as the latest CL features — including new structured programming capabilities, file processing enhancements, and the Integrated Language Environment (ILE).

Students without previous knowledge of CL will learn the basics quickly. As the book progresses methodically to more complex processes and concepts, it guides readers smoothly toward a professional grasp of CL programming techniques and style. Review questions, hands-on exercises, and programming assignments reinforce each chapter's contents.

Professional programmers will also find this book useful as a daily CL reference. In addition to 25 chapters covering CL from start to finish, a comprehensive appendix serves as a condensed reference to the CL commands used most often in programs. Two other appendices cover the essentials of programming tools and debugging.

With *Control Language Programming for IBM i*, you will:

- Learn the role of CL in the IBM i environment
- Understand the IBM i user interface and programming tools
- Recognize the data types supported by CL, and when to use them
- Learn to define and use program variables, including pointer-based variables and data structures
- Use structured statements to organize CL processing and control workflow
- Perform program and procedure calls, passing parameters
- Understand critical ILE concepts, including procedures and activation groups
- Integrate IBM application programming interface (API) programs with CL

About the Authors

Jim Buck's career in IT spans more than 25 years, primarily in the manufacturing and healthcare industries. He is a programmer/analyst instructor at Gateway Technical College in Kenosha, Wisconsin; eight-year president of the Wisconsin Midrange Computer Professional Association (WMCOPA); and the recipient of the 2007 IBM System i Innovation – Education Excellence Award. Jim has been instrumental in creating an advisory board for Gateway's IBM i curriculum, developing classes and seminars in IBM's programming software, and opening networking opportunities for students. Jim is co-author of the textbooks *Mastering IBM i* (MC Press, 2011) and *Programming in RPG/4i* (MC Press, 2010).

Bryan Meyers is well known to IBM i technicians as the author of a number of popular books and frequent magazine articles. His programming, management, and consulting career has spanned most of the IBM midrange history, from the Systems/360 through the AS/400 and Power Systems using IBM i. For much of that time, Bryan was the IT director for an international hospitality franchise. He has also managed computer operations for municipal government, international construction, and broadcasting media industries. Currently, Bryan presents IBM i training to organizations worldwide in a variety of environments, including onsite training, video programs, and online learning. In addition to *Control Language Programming for IBM i*, his books include *Programming in RPG/4i* (MC Press, 2011) and *RPG/4i Jump Start* (Cory Street Press, 2001).

Dan Riehl is President of The 400 School, Inc., a leading provider of technical training for IBM i systems. He is also President of the IT Security and Compliance Group, LLC, which provides security consulting, training, and software for IBM i. For more than 20 years, Dan has been a writer and technical editor for *System iWorld* magazine, where he writes articles related to system security, system management, and other technical topics.
