**Recent Advances in Flowering Time Control** Christian Jung,Klaus Pillen,Dorothee Staiger,George Coupland,Maria von Korff,2017-03-10 The onset of flowering is an important step during the lifetime of a flowering plant During the past two decades there has been enormous progress in our understanding of how internal and external environmental cues control the transition to reproductive growth in plants Many flowering time regulators have been identified from the model plant *Arabidopsis thaliana* Most of them are assembled in regulatory pathways which converge to central integrators which trigger the transition of the

vegetative into an inflorescence meristem For crop cultivation the time of flowering is of utmost importance because it determines yield Phenotypic variation for this trait is largely controlled by genes which were often modified during domestication or crop improvement Understanding the genetic basis of flowering time regulation offers new opportunities for selection in plant breeding and for genome editing and genetic modification of crop species The Flight of Icarus Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions

**Regulation and the Global Financial Crisis** Daniel Cash, Robert Goddard, 2020-11-24 The Financial Crisis was a cross sector crisis that fundamentally affected modern society Regulation as a concept was both blamed for allowing the crisis to happen but also tasked with developing and implementing solutions in the wake of the crash In this book a number of specialists from a range of fields have contributed their insights into the effect of the Financial Crisis upon the regulatory frameworks affecting their fields how regulators have responded to the Crisis and then what this may mean for the future of regulation within those industries These analyses are joined by a picture of past financial crises which reveals interesting patterns and then analyses of architectural regulatory models that were fundamentally affected by the Crisis The book aims to allow sector specialists the freedom to share their insights so that potentially a broader picture can be identified Providing an interesting and thought provoking account of this societally impactful era this book will help the reader develop a more informed understanding of the potential future of financial regulation The book will be of value to researchers students advanced level students regulators and policymakers
