

A satellite view of Earth from space, showing the curvature of the planet and the blue of the oceans. The top half of the image shows a lighter, possibly icy or cloud-covered region, while the bottom half shows darker, more detailed oceanic features with some yellowish-brown patches. A thin blue line of the atmosphere is visible along the right edge.

Cosmopolitan Commons Sharing Resources And Risks Across Borders Infrastructures:

Cosmopolitan Commons Cornelis Disco,Eda Kranakis,2013-06-07 A new approach in commons theory to understand the interactions of technology society and nature supported by case studies of new transnational European commons With the advent of modernity the sharing of resources and infrastructures rapidly expanded beyond local communities into regional national and even transnational space nowhere as visibly as in Europe with its small scale political divisions This volume views these shared resource spaces as the seedbeds of a new generation of technology rich bureaucratic and transnational commons Drawing on the theory of cosmopolitanism which seeks to model the dynamics of an increasingly interdependent world and on the tradition of commons scholarship inspired by the late Elinor Ostrom the book develops a new theory of cosmopolitan commons that provides a framework for merging the study of technology with such issues as risk moral order and sustainability at levels beyond the nation state After laying out the theoretical framework the book presents case studies that explore the empirical nuances airspace as transport commons radio broadcasting hydropower weather forecasting and genetic diversity as information commons transboundary air pollution and two capstone studies of interlinked temporally layered commons one on overlapping commons within the North Sea for freight fishing and fossil fuels and one on commons for transport salmon fishing and clean water in the Rhine Contributors H kon With Andersen Nil Disco Paul N Edwards Arne Kaijser Eda Kranakis Kristiina Korjonen Kuusipuro Tiago Saraiva Nina Wormbs *Cosmopolitan Commons* Cornelis Disco,Eda Kranakis,2013-06-07 A new approach in commons theory to understand the interactions of technology society and nature supported by case studies of new transnational European commons With the advent of modernity the sharing of resources and infrastructures rapidly expanded beyond local communities into regional national and even transnational space nowhere as visibly as in Europe with its small scale political divisions This volume views these shared resource spaces as the seedbeds of a new generation of technology rich bureaucratic and transnational commons Drawing on the theory of cosmopolitanism which seeks to model the dynamics of an increasingly interdependent world and on the tradition of commons scholarship inspired by the late Elinor Ostrom the book develops a new theory of cosmopolitan commons that provides a framework for merging the study of technology with such issues as risk moral order and sustainability at levels beyond the nation state After laying out the theoretical framework the book presents case studies that explore the empirical nuances airspace as transport commons radio broadcasting hydropower weather forecasting and genetic diversity as information commons transboundary air pollution and two capstone studies of interlinked temporally layered commons one on overlapping commons within the North Sea for freight fishing and fossil fuels and one on commons for transport salmon fishing and clean water in the Rhine Contributors H kon With Andersen Nil Disco Paul N Edwards Arne Kaijser Eda Kranakis Kristiina Korjonen Kuusipuro Tiago Saraiva Nina Wormbs **Borders as Infrastructure** Huub Dijstelbloem,2021-08-17 An investigation of borders as moving entities that influence our notions of territory authority

sovereignty and jurisdiction In *Borders as Infrastructure* Huub Dijstelbloem brings science and technology studies as well as the philosophy of technology to the study of borders and international human mobility Taking Europe's borders as a point of departure he shows how borders can transform and multiply and how they can mark conflicts over international orders Borders themselves are moving entities he claims and with them travel our notions of territory authority sovereignty and jurisdiction The philosophies of Bruno Latour and Peter Sloterdijk provide a framework for Dijstelbloem's discussion of the material and morphological nature of borders and border politics Dijstelbloem offers detailed empirical investigations that focus on the so called migrant crisis of 2014-2016 on the Greek Aegean Islands of Chios and Lesbos the Europe surveillance system Eurosur border patrols at sea the rise of hotspots and humanitarian borders the technopolitics of border control at Schiphol International Airport and the countersurveillance by NGOs activists and artists who investigate infrastructural border violence Throughout *Dijstelbloem* explores technologies used in border control including cameras databases fingerprinting visual representations fences walls and monitoring instruments Borders can turn places routes and territories into zones of death Dijstelbloem concludes that Europe's current relationship with borders renders borders and Europe itself an extreme infrastructure obsessed with boundaries and limits

Waste Is Information Dietmar Offenhuber, 2023-12-05 The relationship between infrastructure governance and the ways we read and represent waste systems examined through three waste tracking and participatory sensing projects Waste is material information Landfills are detailed records of everyday consumption and behavior much of what we know about the distant past we know from discarded objects unearthed by archaeologists and interpreted by historians And yet the systems and infrastructures that process our waste often remain opaque In this book Dietmar Offenhuber examines waste from the perspective of information considering emerging practices and technologies for making waste systems legible and how the resulting datasets and visualizations shape infrastructure governance He does so by looking at three waste tracking and participatory sensing projects in Seattle São Paulo and Boston Offenhuber expands the notion of urban legibility the idea that the city can be read like a text to introduce the concept of infrastructure legibility He argues that infrastructure governance is enacted through representations of the infrastructural system and that these representations stem from the different stakeholders interests which drive their efforts to make the system legible The Trash Track project in Seattle used sensor technology to map discarded items through the waste and recycling systems the Forager project looked at the informal organization processes of waste pickers working for Brazilian recycling cooperatives and mobile systems designed by the city of Boston allowed residents to report such infrastructure failures as potholes and garbage spills Through these case studies Offenhuber outlines an emerging paradigm of infrastructure governance based on a complex negotiation among users technology and the city

America by the Numbers Emmanuel Didier, 2020-04-07 How new techniques of quantification shaped the New Deal and American democracy When the Great Depression struck the US government lacked tools to assess the situation there was no reliable way to gauge the

unemployment rate the number of unemployed or how many families had abandoned their farms to become migrants In America by the Numbers Emmanuel Didier examines the development in the 1930s of one such tool representative sampling Didier describes and analyzes the work of New Deal agricultural economists and statisticians who traveled from farm to farm in search of information that would be useful for planning by farmers and government agencies Didier shows that their methods were not just simple enumeration these new techniques of quantification shaped the New Deal and American democracy even as the New Deal shaped the evolution of statistical surveys Didier explains how statisticians had to become detectives and anthropologists searching for elements that would help them portray America as a whole Representative surveys were one of the most effective instruments for their task He examines pre Depression survey techniques the invention of the random sampling method and the development of the Master Sample and the application of random sampling by employment experts to develop the Trial Census of Unemployment **Underground** Blake Atwood,2021-09-28 How Iranians forged a vibrant informal video distribution infrastructure when their government banned all home video technology in 1983 In 1983 the Iranian government banned the personal use of home video technology In Underground Blake Atwood recounts how in response to the ban technology enthusiasts cinephiles entrepreneurs and everyday citizens forged an illegal but complex underground system for video distribution Atwood draws on archival sources including trade publications newspapers memoirs films and laws but at the heart of the book lies a corpus of oral history interviews conducted with participants in the underground He argues that videocassettes helped to institutionalize the broader underground within the Islamic Republic As Atwood shows the videocassette underground reveals a great deal about how people construct vibrant cultures beneath repressive institutions It was not just that Iranians gained access to banned movies but rather that they established routes acquired technical knowledge broke the law and created rituals by passing and trading plastic videocassettes As material objects the videocassettes were a means of negotiating the power of the state and the agency of its citizens By the time the Ministry of Culture and Islamic Guidance lifted the ban in 1994 millions of videocassettes were circulating efficiently and widely throughout the country The very presence of a video underground signaled the failure of state policy to regulate media Embedded in the informal infrastructure even in the videocassettes themselves was the triumph of everyday people over the state Infrastructural Brutalism Michael Truscello,2020-09-01 How drowned town literature road movies energy landscape photography and death train narratives represent the brutality of industrial infrastructures In this book Michael Truscello looks at the industrial infrastructure not as an invisible system of connectivity and mobility that keeps capitalism humming in the background but as a manufactured miasma of despair toxicity and death Truscello terms this infrastructural brutality a formulation that not only alludes to the historical nexus of infrastructure and the concrete aesthetic of Brutalist architecture but also describes the ecological political and psychological brutality of industrial infrastructures **Machineries of Oil** Katayoun Shafiee,2023-08-15 The emergence of the international oil

corporation as a political actor in the twentieth century seen in BP's infrastructure and information arrangements in Iran. In the early twentieth century international oil corporations emerged as a new kind of political actor. The development of the world oil industry argues Katayoun Shafiee was one of the era's largest political projects of techno-economic development. In this book Shafiee maps the machinery of oil operations in the Anglo-Iranian oil industry between 1901 and 1954, tracking the organizational work involved in moving oil through a variety of technical, legal, scientific, and administrative networks. She shows that in a series of disagreements the British-controlled Anglo-Iranian Oil Company (AIOC), which later became BP, relied on various forms of information management to transform political disputes into techno-economic calculation, guaranteeing the company complete control over profits, labor, and production regimes. She argues that the building of alliances and connections that constituted Anglo-Iranian oil's infrastructure reconfigured local politics of oil regions and examines how these arrangements in turn shaped the emergence of both nation-state and transnational oil corporation. Drawing on her extensive archival and field research in Iran, Shafiee investigates the surprising ways in which nature, technology, and politics came together in battles over mineral rights, standardizing petroleum expertise, formulas for calculating profits, production rates, and labor, the Persianization of employees, nationalism, and oil nationalization, and the long-distance machinery of an international corporation. Her account shows that the politics of oil cannot be understood in isolation from its technical dimensions. The open access edition of this book was made possible by generous funding from Knowledge Unlatched.

Monitoring Movements in Development Aid Casper Bruun Jensen, Brit Ross Winthereik, 2013-08-30. An examination of emerging information infrastructures that are intended to increase accountability and effectiveness in partnerships for development aid. In *Monitoring Movements in Development Aid*, Casper Jensen and Brit Winthereik consider the processes, social practices, and infrastructures that are emerging to monitor development aid, discussing both empirical phenomena and their methodological and analytical challenges. Jensen and Winthereik focus on efforts by aid organizations to make better use of information technology; they analyze a range of development aid information infrastructures created to increase accountability and effectiveness. They find that constructing these infrastructures is not simply a matter of designing and implementing technology but entails forging new platforms for action that are simultaneously imaginative and practical, conceptual and technical. After presenting an analytical platform that draws on science and technology studies and the anthropology of development, Jensen and Winthereik present an ethnography-based analysis of the mutually defining relationship between aid partnerships and infrastructures, the crucial role of users both actual and envisioned in aid information infrastructures, efforts to make aid information dynamic and accessible, existing monitoring activities of an environmental NGO, and national-level performance audits which encompass concerns of both external control and organizational learning. Jensen and Winthereik argue that central to the emerging movement to monitor development aid is the blurring of means and ends: aid information infrastructures are both technological platforms for knowledge about aid and

forms of aid and empowerment in their own right **Boundary Objects and Beyond** Geoffrey C. Bowker, Stefan Timmermans, Adele E. Clarke, Ellen Balka, 2016-02-26 The multifaceted work of the late Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues Susan Leigh Star 1954 2010 was one of the most influential science studies scholars of the last several decades In her work Star highlighted the messy practices of discovering science asking hard questions about the marginalizing as well as the liberating powers of science and technology In the landmark work *Sorting Things Out* Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems Star's most celebrated concept was the notion of boundary objects representational forms things or theories that can be shared between different communities with each holding its own understanding of the representation Unfortunately Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work This volume collects articles by Star that set out some of her thinking on boundary objects marginality and infrastructure together with essays by friends and colleagues from a range of disciplines from philosophy of science to organization science that testify to the wide ranging influence of Star's work Contributors Ellen Balka Eevi E Beck Dick Boland Geoffrey C Bowker Janet Ceja Alcal Adele E Clarke Les Gasser James R Griesemer Gail Hornstein John Leslie King Cheris Kramarae Maria Puig de la Bellacasa Karen Ruhleder Kjeld Schmidt Brian Cantwell Smith Susan Leigh Star Anselm L Strauss Jane Summerton Stefan Timmermans Helen Verran Nina Wakeford Jutta Weber

Cosmopolitan Commons Sharing Resources And Risks Across Borders Infrastructures: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Cosmopolitan Commons Sharing Resources And Risks Across Borders Infrastructures : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
