**Cybersecurity and Human Rights in the Age of Cyberveillance** Joanna Kulesza, Roy Balleste, 2015-12-17  
Cybersecurity and Human Rights in the Age of Cyberveillance is a collection of articles by distinguished authors from the US and Europe and presents a contemporary perspective on the limits online of human rights. By considering the latest political events and case law including the NSA PRISM surveillance program controversy, the planned EU data protection amendments and the latest European Court of Human Rights jurisprudence, it provides an analysis of the ongoing legal discourse on global cyberveillance. Using examples from contemporary state practice including content filtering and Internet shutdowns during the Arab Spring as well as the PRISM controversy, the authors identify limits of state and third party interference with individual human rights of Internet users. Analysis is based on existing human rights standards as enshrined within international law including the Universal Declaration of Human Rights, International Covenant on Civil and Political Rights, European Convention on Human Rights and recommendations from the Human Rights Council. The definition of human rights perceived as freedoms and liberties guaranteed to every human being by international legal consensus will be presented based on the rich body of international law. The book is designed to serve as a reference source for early 21st century information policies and on the future of Internet governance and will be useful to scholars in the information studies fields including computer information and library science. It is also aimed at scholars in the fields of international law, international relations, diplomacy studies and political science.

Human Rights and 21st Century Challenges Dapo Akande, Jaakko Kuosmanen, Helen McDermott, Dominic Roser, 2020  
How might three of the largest challenges of the 21st century—armed conflict, environment, and poverty—be addressed using a human rights framework? This book engages with this question through contributions from prominent figures in the debate as it considers both foundational issues of theory as well as applied questions.

David, Yaël Ronen, Yuval Shany, J. H. H. Weiler, 2021-08-26 This collection of essays is written by some of the world's leading experts in international human rights law and corresponds to the main junctures in the professional life of Professor David Kretzmer a leading human right academic and practitioner The different essays focus on contemporary human rights protection challenges They address conceptual problems such as differences between limits and restrictions and application of human rights standards to businesses and international organisations legal doctrinal responses to changing realities in the field of surveillance and identity politics the weakness of monitoring institutions engaged in standard setting and the practical difficulties in applying international human rights law to the Israeli Palestinian conflict in a manner sensitive to gender dimensions and the particular political dynamics of the situation Collectively the essays offer a rich picture of the current potential shortcomings of international human rights law in addressing complex problems of law politics and ethics *Research Handbook on Human Rights and Digital Technology* Ben Wagner, Matthias C. Kettemann, Kilian Vieth-Ditlmann, Susannah Montgomery, 2025-01-09 Bringing together perspectives from academia and practice this second edition Research Handbook provides fresh insights into debates surrounding digital technology and how to respect and protect human rights in an increasingly digital world New and updated chapters cover the issues posed by the management of key internet resources the governance of its architecture and the role of different stakeholders *Historical Dictionary of Human Rights* Jacques Fomerand, 2021-03-29 The second edition of Historical Dictionary of Human Rights explores both the theory and the practice of international human rights with a focus on the norms and institutions that make up the architecture of the global human rights regime and the tools processes and procedures through which such norms are realized and enforced Particular attention is given to the contextual political and sociological factors that shape and constrain the operation and functioning of international human rights institutions and their state and non state actors This is done through a chronology an introduction and an extensive bibliography The dictionary section has more than 1 000 cross referenced entries on terminology conventions treaties intergovernmental organizations in the United Nations and non governmental organizations as well as some of the pioneers and defenders This book is an excellent resource for students researchers and anyone wanting to know more about human rights

**Blasphemy and Freedom of Expression** Jeroen Temperman, András Koltay, 2017-11-16 This book details the legal ramifications of existing anti blasphemy laws and debates the legitimacy of such laws in Western liberal democracies A Research Agenda for Digital Politics William H. Dutton, 2020-05-29 This Elgar Research Agenda showcases insights from

leading researchers on the charged issues and questions that lie ahead in the multidisciplinary field of digital politics. Covering the political implications of the Internet, social media, datafication and computational analytics, it looks to the future of how research might address the political challenges of the digital age and maps the key emerging trends in this field.

Sex Trafficking of Children Online Beatriz Susana Uitts, 2022-07-20. This book addresses child sex trafficking in the era of digital technology. As a global problem, human trafficking frequently victimizes the most vulnerable children. Offenders often use the Internet as a vehicle for criminal activities, including acts to sexually exploit them. With Internet access growing exponentially, more children are online every day, increasing their risk of becoming involved in sexual exploitation or being treated as a commodity. Inconsistent law among countries and the lack of adequate cooperation across borders make combating this issue increasingly difficult. Using a human rights approach, this book offers alternative solutions and recommendations, including establishing a legal protection framework to fight practices that sexually exploit children in cyberspace. In addition, it promotes multi-stakeholder collaboration in the context of corporate social responsibility to prevent and combat these offenses. This book explores the intersection of children's human rights, online sex trafficking, and international legislation. It provides helpful insights for lawmakers, legal practitioners, scholars, law enforcement officers, child advocates, and students interested in human rights, law, criminal law, and child protection.

Intelligent Computing Kohei Arai, 2022-07-06. The book *Intelligent Computing: Proceedings of the 2022 Computing Conference* is a comprehensive collection of chapters focusing on the core areas of computing and their further applications in the real world. Each chapter is a paper presented at the Computing Conference 2022, held on July 14-15, 2022. Computing 2022 attracted a total of 498 submissions, which underwent a double-blind peer review process. Of those 498 submissions, 179 submissions have been selected to be included in this book. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this book interesting and valuable as it provides the state-of-the-art intelligent methods and techniques for solving real-world problems. We also expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.
