Commingled And Disarticulated Human Remains Working Toward Improved Theory Method And Data:

Commingled and Disarticulated Human Remains Anna J. Osterholtz, Kathryn M. Baustian, Debra L.

Martin, 2013-08-15 *Commingled and Disarticulated Human Remains Working Toward Improved Theory Method and Data* brings together research that provides innovative methodologies for the analysis of commingled human remains. It has temporal and spatial breadth with case studies coming from pre-state to historic periods as well as from both the New and Old World. Highlights of this volume include standardized methods and presents best practices in the field using a case study approach. It demonstrates how data gathered from commingled human remains can be incorporated into the overall interpretation of a site. It explores the best way to formulate population size using commingled remains. Field archaeologists, bioarchaeologists, academic anthropologists, forensic anthropologists, zoo archaeologists, and students of anthropology and archaeology will find this to be an invaluable resource. Bioarchaeology Mark Q. Sutton, Eric J. Bartelink, 2025-05-21 *Bioarchaeology* covers the history and general theory of the field plus the recovery and laboratory treatment of human remains. *Bioarchaeology* is the study of human remains in context from an archaeological and anthropological perspective. The book explores through numerous case studies how the ways a society deals with their dead can reveal a great deal about that society including its religious, political, economic, and social organizations. It details recovery methods and how once recovered human remains can be analyzed to reveal details about the funerary system of the subject society and inform on a variety of other issues such as health, demography, disease, workloads, mobility, sex, and gender, and migration. Finally, the book highlights how bioarchaeological techniques can be used in contemporary forensic settings and in investigations of genocide and war crimes. In *Bioarchaeology*, theories, principles, and scientific techniques are laid out in a clear, understandable way, and students of archaeology at undergraduate and graduate levels will find this an excellent guide to the field.

Theoretical Approaches to Analysis and Interpretation of Commingled Human Remains Anna J.

Osterholtz, 2015-11-05 This volume centers on the application of social theory to commingled remains with special focus on the cultural processes that create the assemblages as a way to better understand issues of meaning, social structure, and interaction and lived experience in the past. The importance of the application of theoretical frameworks to bioarchaeology in general has been recognized, but commingled and fragmentary assemblages require an increased theoretical focus. Too often these assemblages are still relegated to appendices; they are analytical puzzles that need the interpretive power offered by social theory. *Theoretical Approaches to Analysis and Interpretation of Commingled Human Remains* provides case studies that illustrate how an appropriate theoretical model can be used with commingled and fragmentary remains to add to overall site and population level interpretations of past and present peoples. Specifically, the contributions show a blending and melding of different social theories, highlighting the broad interpretive power of social theory. Contributors are drawn from both the Old and New World. Temporally, time periods from the Neolithic to historic periods are present, further widening the

audience for the volume The Poetics of Processing Anna J. Osterholtz, 2020-12-01 In 2002 Neil Whitehead published *Dark Shamans Kanaïm and the Poetics of Violent Death* in which he applied the concept of poetics to the study of violence and observed the power of violence in the creation and expression of identity and social relationships *The Poetics of Processing* applies Whitehead's theory on violence to mortuary and skeletal assemblages in the Andes Mexico the US Southwest Jordan Ethiopia Egypt and Turkey examining the complex cultural meanings of the manipulation of remains after death The contributors interpret postmortem treatment of the physical body through a poetics lens examining body processing as a mechanism for the re creation of cosmological events and processing's role in the creation of social memory They analyze methods of processing and the ways in which the living use the physical body to stratify society and gain power as evidenced in rituals of body preparation and burial around the world objects buried with the dead and the hierarchies of tomb occupancy the dissection of cadavers by medical students the appropriation of living spaces once occupied by the dead and the varying treatments of the remains of social outsiders prisoners of war and executed persons *The Poetics of Processing* combines social theory and bioarchaeology to examine how the living manipulate the bodies of the dead for social purposes These case studies ranging from prehistoric to historic and modern and from around the globe explore this complex material relationship that does not cease with physical death This volume will be of interest to mortuary archaeologists bioarchaeologists and cultural anthropologists Contributors Dil Singh Basanti Roselyn Campbell Carlina de la Cova Eric Haanstad Scott Haddow Christina Hodge Christopher Knusel Kristin Kuckelman Clark Spencer Larsen Debra Martin Kenneth Nystrom Adrienne Offenbecker Megan Perry Marin Pilloud Beth K Scaffidi Mehmet Somel Kyle D Waller Handbook of Forensic Anthropology and Archaeology Soren Blau, Douglas H.
