Creative Families Jana Mikats, Susanne Kink-Hampersberger, Libora Oates-Indruchová, 2021-06-01 This edited collection brings together two strands of current discussions in gender research through the concept of creativity First it addresses creativity in the context of the family by exploring changing and newly emergent family forms and ways of creating and maintaining intimate relationships Creativity here is understood not as just newness or originality but as that which in the words of Eisler and Montouri 2007 supports nurtures and actualizes life by increasing the number of choices open to individuals and communities One aim of this book therefore is to investigate the social collaborative and creative interactions in contemporary family and kin formations in Europe Second the volume examines how new media and technologies are entering and shaping everyday family lives Technological transformations and adaptations have not only enabled the creation

of new forms of families and ways of family living but also challenged the established constellations of gender and family arrangements. The present volume addresses these issues from multiple perspectives and in different contexts and explores the involvement of different actors.
