Critical Mass Philip Ball,2004 In searching for answers the science writer Philip Ball argues that we can enlist help from a seemingly unlikely source physics The first person to think this way was the seventeenth century English philosopher Thomas Hobbes His approach described in *Leviathan* was based not on utopian wishful thinking but rather on Galileo s mechanics it was an attempt to construct a moral and political theory from scientific first principles Although his solution absolute monarchy is unappealing today Hobbes sparked a new way of thinking about human behavior in looking for the scientific rules of society Adam Smith Immanuel Kant Auguste Comte and John Stuart Mill pursued this same idea from different political perspectives BOOK JACKET Critical Mass Philip Ball,2004 *Bridging the Gap* Bert Ayers,2015-10-25 Take a look at a critical transition in Albania s history *Bridging the Gap* provides a glimpse into the country and provides a statistical analysis of two villages Creating Contagious Commitment, 2nd Edition Andrea Shapiro,2010-01-11 Too often necessary and technically appropriate change initiatives fall short of expected gains because leaders fail to involve employees and leverage their perspectives This deprives leaders of valuable input and causes the very people who are expected to modify the way they work to feel discounted and disconnected *Creating Contagious Commitment Applying the Tipping Point to Organizational Change* presents a proven approach to turn this all too common situation around It goes to the heart of effective change implementation and shows how to move employees from being apathetic or resistant to becoming committed advocates of a change *Creating Contagious Commitment* demonstrates why many of the traditional approaches to change implementation such as focusing on the easily measurable technical aspects or relying on mass awareness campaigns don t work very well especially on their own It explains the dynamics that contribute to successful change initiatives and how to use them right now in your own initiatives The accessibility of the concepts and the practical strategies they provide make *Creating Contagious Commitment* a unique and powerful guide for change agents in any organization Andrea Shapiro s clear and skillful blending of theory with useful examples brings these concepts to life in a way that appeals to anyone who is involved in change Solidly grounded in organizational theory systems thinking and real world experience *Creating Contagious Commitment* can be used as a stand alone resource or in combination with the companion *Change Dialogue and Action* workshop with its interactive computer simulation called the Tipping Point It has been applied by hundreds of change leaders around the world in a wide range of organizations from banks and hospitals to high tech corporations to make organizational change both contagious and sustainable It is packed with diagrams illustrations and stories from the field many of them first person accounts of applying its lessons Visit [CreatingContagiousCommitment.com](http://CreatingContagiousCommitment.com) to learn more Praise for *Creating Contagious Commitment* It is very easy to have good intentions and even easier to get advice from someone who has good intentions What is hard is to recognize the landmines on the path to successful change *Creating Contagious Commitment* helps identify and think about such obstacles before we encounter them making the path to change more

thoughtful and ultimately more successful Dan Ariely Ph D James B Duke Professor of Behavioral Economics author Predictably Irrational It is only by effectively influencing people s beliefs values and changing social norms that we can change behaviors that get us all to yes Andrea understands this and clearly maps out how new cultural norms can be systematically embedded into any organization This book is a must have in any change agent s toolbox Peter Fail M Sc Corporate Procurement Manager Durham County Council UK The Tipping Point is a brilliant computer model of change initiatives as they unfold in large complex organizations Change agents need to be informal keenly aware of the different needs of different types of people and committed to their purpose This book shows what to do and what happens along the way both in the model and in real life Art Kleiner author Who Really Matters and The Age of Heretics Understanding Military Doctrine Harald Hoiback,2013-07-18 This book puts military doctrine into a wider perspective drawing on military history philosophy and political science Military doctrines are institutional beliefs about what works in war given the trauma of 9 11 and the ensuing War on Terror serious divergences over what the message of the new military doctrine ought to be were expected around the world However such questions are often drowned in ferocious meta doctrinal disagreements What is a doctrine after all This book provides a theoretical understanding of such questions Divided into three parts the author investigates the historical roots of military doctrine and explores its growth and expansion until the present day and goes on to analyse the main characteristics of a military doctrine Using a multidisciplinary approach the book concludes that doctrine can be utilized in three key ways as a tool of command as a tool of change and as a tool of education This book will be of much interest to students of military studies civil military relations strategic studies and war studies as well as to students in professional military education **Critical Mass** Philip Ball,2025-06-25 Are there any laws of nature that influence the ways in which humans behave and organize themselves In the seventeenth century tired of the civil war ravaging England Thomas Hobbes decided that he would work out what kind of government was needed for a stable society His approach was based not on utopian wishful thinking but rather on Galileo s mechanics to construct a theory of government from first principles His solution is unappealing to today s society yet Hobbes had sparked a new way of thinking about human behavior in looking for the scientific rules of society Adam Smith Immanuel Kant Auguste Comte and John Stuart Mill pursued this idea from different political perspectives Little by little however social and political philosophy abandoned a scientific approach Today physics is enjoying a revival in the social political and economic sciences Ball shows how much we can understand of human behavior when we cease to try to predict and analyze the behavior of individuals and instead look to the impact of individual decisions whether in circumstances of cooperation or conflict can have on our laws institutions and customs Lively and compelling Critical Mass is the first book to bring these new ideas together and to show how they fit within the broader historical context of a rational search for better ways to live **Investment Leadership and Portfolio Management** Brian D. Singer,Greg Fedorinchik,2009-10-26 An industry leader candidly examines the role of investment leadership in

portfolio management Investment Leadership investment philosophy process and portfolio construction communication and transparency and ethics and integrity Leadership issues in investment firms are a serious concern and this book addresses those concerns Details the strong correlation between excellence in investment leadership and excellence in portfolio management Written by a group of experienced professionals in the field including the Chairman of the CFA Institute Board of Governors Understanding how to operate in today's dynamic investment environment is critical Investment Leadership Portfolio Management contains the insights and information needed to make significant strides in this dynamic arena

**Understanding Creative Business** Jim Shorthose, Neil Maycroft, 2016-02-17 From authors used to operating between the commercial public and independent sectors of the mixed cultural economy Understanding Creative Business bridges the gap between creative practice and mainstream business organisation entrepreneurship and management Using stories case studies and exercises it discusses the positioning of creative practice within professional and business development cultural policy making and the wider cultural economy and suggests what the broader field of business and management studies can learn from the informal structure and working practices of creative industries networks Consideration is given to how ethical and moral value orientations animate creative practice and how they play into the wider debate about social responsibilities within business and public policy The authors also explore the way creative business practices often coalesce around emergent and self organized networks and how this signals alternative approaches to management entrepreneurship business organisation and collaboration Above all else this book is about relationships the practical examples expose the ways creative business can professionalise research develop and sustain routes to growth through open collaborative innovation and the lessons this holds for more general business innovation and policy engagements with the public domain Written in accessible language this book will be useful to researchers students educators and practitioners within the creative industries to those working within cultural policy arts and cultural management and to all with an interest in management and leadership

Stalking the Black Swan Kenneth A. Posner, 2010-03-31 Kenneth A Posner spent close to two decades as a Wall Street analyst tracking the so called specialty finance sector which included controversial companies such as Countrywide Fannie Mae Freddie Mac CIT and MasterCard many of which were caught in the subprime mortgage and capital markets crisis of 2007 While extreme volatility is nothing new in finance the recent downturn caught many off guard indicating that the traditional approach to decision making had let them down Introducing a new framework for handling and evaluating extreme risk Posner draws on years of experience to show how decision makers can best cope with the Black Swans of our time Posner's shrewd assessment combines the classic fundamental research approach of Benjamin Graham and David Dodd with more recent developments in cognitive science computational theory and quantitative finance He outlines a probabilistic approach to decision making that involves forecasting across a range of scenarios and he explains how to balance confidence react accurately to fast breaking information overcome information overload zero in on the critical
