Crocheting Adventures With Hyperbolic Planes:

Crocheting Adventures with Hyperbolic Planes Daina Taimina, 2009-02-23 Winner of the Euler Book Prize Awarded by the Mathematical Association of America With more than 200 full color photographs this non traditional tactile introduction to non Euclidean geometries also covers early development of geometry and connections between geometry art nature and sciences For the crafter or would be crafter there are detailed instructions for how to crochet various geometric models and how to use them in explorations From the Foreword by William Thurston These models have a fascination far beyond their visual appearance As illustrated in the book there is actually negative curvature and hyperbolic geometry all around us but people generally see it without seeing it You will develop an entirely new understanding by actually following the simple instructions and crocheting The models are deceptively interesting Perhaps you will come up with your own variations and ideas In any case I hope this book gives you pause for thought and changes your way of thinking about mathematics

, [The Fine Art of Crochet](#) Gwen Blakley Kinsler, 2013-06-17 Fiber artists around the world have embraced crochet as an inventive medium like never before Expanding on the creative possibilities and using sculpture immense site specific installations performance and mixed media objects they have used crochet techniques to explore feminine craft and heritage dissect gender codes and show the primal creative expression represented by crochet In [The Fine Art of Crochet](#) author Gwen Blakley Kinsler looks at the art crochet movement from 1915 onward to the crochet revolution of the 1960s profiling twenty of the most innovative practitioners working today Offering insight to those who may not have otherwise thought to go beyond the purely practical aspect of crochet she features internationally known artists such as Arline Fisch Leslie Pontz Carol Hummel Tracy Krumm

Bonnie Meltzer and Soonran Youn Gwen Blakley Kinsler the founder of the Crochet Guild of America and a fiber art practitioner in her own right examines the concepts and diverse works of these artists in whose hands the magic of crochet creates cutting edge art for the twenty first century Each artist approaches the medium with wonder and the desire to explore its full potential This study and collection of images presents an exploration of the diverse styles unusual shapes and exquisite textures that characterize crocheted art today **The Best Writing on Mathematics 2021** Mircea Pitici, 2022-07-19 The year s finest mathematical writing from around the world This annual anthology brings together the year s finest mathematics writing from around the world and you don t need to be a mathematician to enjoy the pieces collected here These essays from leading names and fresh new voices delve into the history philosophy teaching and everyday aspects of math offering surprising insights into its nature meaning and practice and taking readers behind the scenes of today s hottest mathematical debates Here Viktor Blaj gives a brief history of lockdown mathematics Yelda Nasifoglu decodes the politics of a seventeenth century play in which the characters are geometric shapes and Andrew Lewis Pye explains the basic algorithmic rules and computational procedures behind cryptocurrencies In other essays Terence Tao candidly recalls the adventures and misadventures of growing up to become a leading mathematician Natalie Wolchover shows how old math gives new clues about whether time really flows and David Hand discusses the problem of dark data information that is missing or ignored And there is much much more **Crafting Conundrums** Ellie Baker, Susan Goldstine, 2016-04-19 Designed for crafters puzzle lovers and pattern designers alike Crafting Conundrums Puzzles and Patterns for the Bead Crochet Artist provides methods challenges and patterns that offer a springboard for creative exploration All are illustrated with beautiful color diagrams and photographs Experienced bead crochet crafters looking for a proj **Toward a New Culture of the Material** Frank Bauer, Yoonha Kim, Sabine Marienberg, Wolfgang Schäffner, 2024-09-03 What happens when we begin treating multi stable ambivalent and adaptive behaviors of active matter as a formative principle The contributions of this volume investigate the potential of the processual and untamable ranging from microbial co designing morphogenetic experimentation and atmospheric creation to plasticity and liveliness in architecture history of art and scientific concepts Walking the line between analog and digital forms the 19 perspectives from the Cluster of Excellence Matters of Activity not only cross disciplinary and methodological boundaries but also aim at installing a new material paradigm between the epistemic cultures of sciences humanities and design Investigating a new culture of the material Interdisciplinary views on active structures adaptive materials and sustainability **Language and tool support for 3D crochet patterns** Klara Seitz, Jens Lincke, Patrick Rein, Robert Hirschfeld, 2021-09-09 Crochet is a popular handcraft all over the world While other techniques such as knitting or weaving have received technical support over the years through machines crochet is still a purely manual craft Not just the act of crochet itself is manual but also the process of creating instructions for new crochet patterns which is barely supported by domain specific digital solutions This leads to unstructured and often also ambiguous

and erroneous pattern instructions In this report we propose a concept to digitally represent crochet patterns This format incorporates crochet techniques which allows domain specific support for crochet pattern designers during the pattern creation and instruction writing process As contributions we present a thorough domain analysis the concept of a graph structure used as domain specific language to specify crochet patterns and a prototype of a projectional editor using the graph as representation format of patterns and a diagramming system to visualize them in 2D and 3D By analyzing the domain we learned about crochet techniques and pain points of designers in their pattern creation workflow These insights are the basis on which we defined the pattern representation In order to evaluate our concept we built a prototype by which the feasibility of the concept is shown and we tested the software with professional crochet designers who approved of the concept

Transforming Learning Through Tangible Instruction Sarah Kuhn, 2021-07-12 Transforming Learning Through Tangible Instruction offers a transformative student centered approach to higher education pedagogy that integrates embodied cognition into classroom practice Evidence across disciplines makes clear that people learn with their bodies as well as their brains but no previous book has provided evidence based guidance for adopting and refining its practice in colleges and universities Collecting findings from cognitive science educational neuroscience learning theories and beyond this volume s unique approach radical yet practical effective yet low cost will have profound implications for higher education faculty and administrators engaged in teaching and learning Seven concise chapters explore how physical objects hands on making active construction and other elements of body and environment can enhance comprehension memory and individual and collaborative learning
