**A Treatise on Northern Ireland, Volume II** Brendan O'Leary, 2019-04-04 The second volume of the definitive political history of Northern Ireland This landmark synthesis of political science and historical institutionalism is a detailed study of antagonistic ethnic majoritarianism Northern Ireland was coercively created through a contested partition in 1920 Subsequently Great Britain compelled Sinn Féin's leaders to rescind the declaration of an Irish Republic remain within the British Empire and grant the Belfast Parliament the right to secede If it did so a commission would consider modifying the new border The outcome however was the formation of two insecure regimes North and South both of which experienced civil war while the boundary commission was subverted In the North a control system organized the new majority behind a dominant party that won all elections to the Belfast parliament until its abolition in 1972 The Ulster Unionist Party successfully disorganized Northern nationalists and Catholics Bolstered by the Specials a militia created from the Ulster Volunteer Force this system displayed a pathological version of the Westminster model of democracy which may reproduce one party dominance and enforce national ethnic religious and cultural discrimination How the Unionist elite improvised this control regime and why it collapsed under the impact of a civil rights movement in the 1960s take center stage in this second volume of A Treatise on Northern Ireland The North's trajectory is paired and compared with the Irish Free State's incremental decolonization and restoration of a Republic Irish state building however took place at the expense of the limited prospect of persuading Ulster Protestants that Irish reunification was in their interests or consistent with their identities Northern Ireland was placed under British direct rule in 1972 while counter insurgency practices applied elsewhere in its diminishing empire were deployed from 1969 with disastrous consequences On January 1 1973 however the UK and Ireland joined the then European Economic Community Many hoped that would help end conflict in and over Northern Ireland Such hopes were premature Northern Ireland

Cronin and His Influence on Presidential Studies and Political Science* Michael A. Genovese, 2015-09-04 This publication from Cambria Press is released in conjunction with the 2015 annual meeting of the American Political Science Association APSA 2015 The book's main focus is on presidential leadership and draws inspiration from the scholarship of eminent political scientist Thomas E. Cronin. From evaluating the leadership successes and failures of President George W. Bush and President Barack Obama e.g. on education policy, social security reform, health care, the surveillance of Americans to Franklin D. Roosevelt, Richard Nixon and Ronald Reagan and their handling of coalitions, this book also discusses presidents as war time leaders, presidential leadership and authority, public leadership, US world leadership and the role of chief justices. In addition, the book touches on leadership in higher education and in the global corporate context. Given its coverage, this book will be an important resource for many years to come. *The Quest for Leadership* edited by distinguished political scientist Michael A. Genovese brings together the thought provoking analyses and critical discussions of top scholars and practitioners. This book is a must read not only for political scientists but also for anyone with an interest in leadership especially in US politics      **Henry Handel Richardson Vol 3** Edited By Clive Probyn and Bruce Steele, 2013-07-15 The publication of Henry Handel Richardson's correspondence is a major event in Australian scholarly publishing. There are approximately fifteen hundred unpublished manuscript letters to and from HHR of which almost a thousand are in her own hand. They form a correspondence between Australia, England, Germany, Italy and the USA over a seventy year period 1874 to 1946. The letters shed new light on Henry Handel Richardson's biography, her artistic methods, her personal life, her friendships and antagonisms, her response to Australian readers and to expatriation and her rigorous efforts to maintain a literary life apart from her personal life. The collection begins with HHR's earliest letter, then traces her student days in Leipzig, the publication of Maurice Guest, *The Getting of Wisdom*, *The Fortunes of Richard Mahony*, *The Young Cosima* and *The End of a Childhood* and her struggle late in life with the stringencies of wartime England. In this volume, the widowed HHR moves to the Sussex village where she lived until her death. The letters cover the publication of *The End of a Childhood* and *Other Stories*, the ill-fated *The Young Cosima* and her incomplete memoir *Myself When Young*. War dominated the closing years of her life and she reported her experiences graphically to Mary Kernot. She refused to leave her house even while the Battle of Britain was being fought in the skies above her. The strain and deprivations of war weakened her. When unable to write, her companion and secretary Olga Roncoroni wrote for her and these letters are included. Her last letter is a little pencilled note to Mary Kernot      [Medical Journal of Australia](#), 1924      **Air Transport and Operations** Richard Curran, 2012 Air transport must evolve if it is to optimize its value in the 21st century. The mood in the aerospace industry is positive with regard to economic recovery but the focus in this transitional time must be on sustaining value without losing sight of environmental and safety priorities. This book presents the proceedings of the joint conference held in Delft, the

Netherlands in June 2012 incorporating the 3rd International Air Transport Operations Symposium ATOS the 3rd Association of Scientific Development in Air Traffic Management in Europe ASDA Seminar the 6th International Meeting for Aviation Products Support Processes IMAPP and the 2012 Complex World Seminar The conference brought together over 200 participants from industry and academia all of whom share the common goal of improving performance and capacity by advancing the efficiency sustainability and safety of air transport Presentations at the conference were divided equally between academic papers and more applied industry sessions The book includes the majority of academic papers presented at the conference and provides a wide overview of the issues currently of importance in the world of air transport
