Current Interruption In High Voltage Networks Earlier Brown Boveri Symposia

Brown Boveri Research Center

Current Interruption In High Voltage Networks Earlier Brown Boveri Symposia:

Current Interruption in High-Voltage Networks Klaus Ragaller, 2013-11-11 Shortly after the establishment of the Brown Boveri Research Center in 1967 plans were developed to organize a series of Brown Boveri Scientific Symposia each having a different topic to be held every other year in Baden We choose the subject for a symposium with the following requirements in mind It should characterize a part of a scientific discipline in other words it should concern an area of scholarly study and research It should be of current interest in the sense that important results have recently been obtained and considerable research is underway in the world's scientific community It should bear some relation to the scientific and technological activity of the Company These symposia are intimately related to one of the very basic concepts which have governed the work of many modern manufacturing companies close coupling between science and engineering It is to this coupling that we owe the technical standard of our products and it is this coupling which we hope to be furthered by our symposia

Current Interruption in High-Voltage Networks Klaus Ragaller, 2014-01-15 *Current Interruption in High-voltage Networks* Brown Boveri Research Center, 1978 Semiconductor Devices for Power Conditioning P. Roggwiler, 2012-12-06 The Brown Boveri Symposia are by now part of firmly established tradition This is the seventh event in a series which was initiated shortly after Corporate Research was established as a separate entity within our Company the Symposia are held every other year The themes to date have been 1969 Flow Research on Blading 1971 Real Time Control of Electric Power Systems 1973 High Temperature Materials in Gas Turbines 1975 Nonemissive Electrooptic Displays 1977 Current Interruption in High Voltage Networks 1979 Surges in High Voltage Networks 1981 Semiconductor Devices for Power Conditioning Why have we chosen these titles At the outset we established certain selection criteria we felt that a subject for a Symposium should fulfill the following requirements It should characterize a part of a thoroughly scientific discipline in other words it should describe an area of scholarly study and research It should be of current interest in the sense that important results have recently been obtained and considerable research effort is underway in the international scientific community It should bear some relation to the scientific and technological activity of our Company Let us look at the requirement current interest Some of the topics on the list have been the subject of research for several decades some even from the beginning of the century One might wonder then why such fields could be regarded as particularly timely in the 1960s and 1970s A few remarks on this subject therefore are in order *Power Semiconductor Devices and Circuits* A.A. Jaecklin, 2012-12-06 This symposium was the scientific technical event of the centennial celebration of the Asea Brown Boveri Switzerland The purpose was to assess the present state of the art as well as shaping the basis for future progress in the area of power devices and related power circuits The merger of Brown Boveri BBC with Asea to Asea Brown Boveri ABB three years ago gave new stimulus and enriched the technical substance of the symposium By 1991 100 years after the formation of BBC in Switzerland as a single company this organization has been decentralized forming 35 independent ABB

companies One of them ABB Semiconductors Ltd directly deals with the power semiconductor business These significant changes reflect the changes in the market place increased competition and higher customer expectations have to be fulfilled In line with the core business activities of ABB and with the concept of sustainable development it is natural for ABB to be active in the area of power devices and circuits Increased awareness towards energy conservation is one of the main drives for these activities User friendliness is another drive integration of intelligent functions e g protection and or increased direct computer interfacing of the power circuits Therefore also the R D activities related to the subject of this symposium will in the future be characterized by an even stronger coupling with the market needs For the members of the R D Laboratories this means improved customer partnership beyond operational excellence

Computer Systems for Process Control

Reinhold Güth, 2012-12-06 The Brown Boveri Symposia are by now part of a firmly established tradition This is the ninth event in a series which was initiated shortly after Corporate Research was created as a separate entity within our Company the Symposia are held every other year The themes to date have been 1969 Flow Research on Blading 1971 Real Time Control of Electric Power Systems 1973 High Temperature Materials in Gas Turbines 1975 Nonemissive Electrooptic Displays 1977 Current Interruption in High Voltage Networks 1979 Surges in High Voltage Networks 1981 Semiconductor Devices for Power Conditioning 1983 Corrosion in Power Generating Equipment 1985 Computer Systems for Process Control Why have we chosen these topics At the outset we established certain selection criteria we felt that a subject for a symposium should fulfill the following three requirements It should characterize a part of a thoroughly scientific discipline in other words it should describe an area of scholarly study and research r It should be of current interest in the sense that important results have recently been obtained and considerable research effort is presently underway in the international scientific community It should bear some relation to the scientific and technological activity of our Company Let us look at the requirement current interest Some of the topics on the list above have been the subject of research for several decades some even from the very beginning of the century

Process Technologies for Water Treatment S.

Stucki, 2013-03-09 The Brown Boveri Scientific Symposia by now are part of a firmly established tradition This is the tenth event in a series which was initiated shortly after Corporate Research was created as a separate entity in our company the symposia are held every other year The themes have been 1969 Flow Research on Blading 1971 Real Time Control of Electric Power Systems 1973 High Temperature Materials in Gas Turbines 1975 Nonemissive Electrooptic Displays 1977 Current Interruption in High Voltage Networks 1979 Surges in High Voltage Networks 1981 Semiconductor Devices for Power Conditioning 1983 Corrosion in Power Generating Equipment 1985 Computer Systems for Process Control 1987 Process Technologies for Water Treatment The tenth event in an uninterrupted series that by now goes back almost 20 years is a good opportunity to make a few remarks on the guiding rules that have governed our symposia Why have we chosen these titles At the outset we established certain selection criteria we felt that a subject for a symposium should fulfill the following

three requirements It should characterize a part of an established discipline in other words it should describe an area of scholarly study and research It should be of current interest in the sense that important results have recently been obtained and considerable research is still being undertaken in the world s scientific community It should bear some relation to the scientific and technological activity of the company Library of Congress Name Headings with References Library of Congress,1978 日本国名集 (Japan),1900 **National Union Catalog** , Includes entries for maps and atlases
