Critical Theories, Radical Pedagogies, and Social Education, 2010-01-01 A refreshing collection of essays that offers a range of critical and radical voices which are generally marginalized in the critical social studies mainstream This collection is a good read with valuable insights that can impact teaching practice Canadian Social Studies Canada s National Social Studies Journal Volume 45 Issue 1 Award American Educational Studies Association AERA Critics Choice Book Award 2011 This edited collection begins with the assertion that there are emergent and provocative theories and practices that should be part of the discourse on social studies education in the 21st century Anarchist eco activist anti capitalist and other radical perspectives such as disability studies and critical race theory are explored as viable alternatives in responding to current neo conservative and neo liberal educational policies shaping social studies curriculum and teaching Despite the interdisciplinary nature the field and a historical commitment to investigating fundamental social issues such as democracy human rights and social justice social studies theory and practice tends to be steeped in a reproductive framework celebrating and sustaining the status quo encouraging passive acceptance of current social realities and historical constructions rather than a critical examination of alternatives These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension This book comes at a pivotal moment for radical teaching and for critical pedagogy bringing the radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education

Gallegos, Annette Henry, Mary Bushnell Greiner, Paula Groves Price, 2011-07-05 This groundbreaking volume helps readers understand the history evolution and significance of this wide ranging often misunderstood and increasingly important field of study

Critical Education Against Global Capitalism Paula Allman, 2001-04-30 In today's vernacular Marx outed capitalism well over a century ago but his explanation has been both ignored and misinterpreted by not only his detractors but also by many socialists and even a considerable number of Marxists as well Today we are experiencing the full impact and suffering the repercussions of capitalism's inherent need to become more than ever before a fully internationalized and integrated system of socio economic control and domination the global system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed The Cold War was over and we were promised a lasting peace But as we enter the third millennium we are facing escalating social divisions injustice and oppression with an environment in varying stages of ecological decay Daily we are bombarded by the schizoid media images of capitalism's extremes on television news the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world's slums and then the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation The author argues that critical education is needed to form a movement capable of challenging and then transforming capitalism She also offers an accessible account of Marx's dialectical critique and exposés of capitalism clearly demonstrating the real enemy that should be the focus of anti capitalist and anti globalization struggles This is an account that explains why our main focus should not be on greedy individual capitalists or particular multinational corporations or even their handmaiden institutions such as the World Bank IMF WTO

etc but instead the global network of capitalist social relations and consequent habituated human practices in which we are all involved These together with the historically specific form of capitalist wealth are the real enemy the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future *Leaders in Critical Pedagogy* Brad J Porfilio, Derek R Ford, 2015-12-01 Critical pedagogy has variously inspired mobilized troubled and frustrated teachers activists and educational scholars for several decades now Since its inception the field has been animated by internal antagonism and conflict and this reality has simultaneously spread the influence of the field in and out of education and seriously challenged its status as an integral body of work The various debates that have categorized critical pedagogy have also made it difficult for younger scholars to enter into the literature This is the first book to survey critical pedagogy through first hand accounts of its established and emerging leaders While the book does indeed provide a historical exploration and documentation of the development of critical pedagogy as a contested and dynamic educational intervention as well as analyses of that development and directions toward possible futures it is also intended to provide an accessible and comprehensive entry point for a new generation of activists organizers scholars and educators who place questions of pedagogy and social justice at the heart of their thinking and doing Martin Heidegger once said that Aristotle s life could be summarized in one short sentence He was born he thought he died Porfilio and Ford s brilliantly curated compilation of autobiographical sketches of leaders in critical pedagogy resolutely rejects Heidegger s reductive thesis reminding us all that theory is grounded in the historical specificities and material contradictions of life For those well acquainted with critical pedagogy these theoretical memoirs grant us a unique and sometimes surprisingly intimate glimpse into the lives behind the words we know so well But most importantly the format of the book is an educational intervention into how critical pedagogy can be taught While it is often the case that students find critical pedagogy dense inaccessible and seemingly detached from the everyday concerns of teachers *Emerging Critical Scholarship in Education* Carol Mutch, Jean Rath, 2014-04-23 The doctoral journey is fraught with stops and starts crossroads and blind alleys surprises and epiphanies All successful doctoral students navigate a pathway through these events to reach their final destination Navigating the Doctoral Journey explores examples of these routes in ways that both honour individual stories and highlight the broader issues of uniting emergent research practices with doctoral candidates individual reflexive projects All the doctoral candidates included in this book work with critical topics theories and methods within the field of education they face particular challenges and rewards when pursuing work that will meet institutional and disciplinary expectations of good doctoral level research For them the doctoral process is required to culminate in more than the award of a qualification Their imperative is to demonstrate mastery of the disciplinary norms whilst simultaneously challenging dominant models and making authentic contributions to the benefit of broader society Navigating the Doctoral Journey addresses the isolation and challenges of what it means to conduct critical doctoral research within a highly contested domain of knowledge This is not a

simplistic self help guide to clearly map a proven route to doctoral success rather the book provides a range of possible answers to the questions of how candidates experience doctoral studies what is critical about each contributor s research and how this affects what each person does as he or she researches [Using Critical Research for Educational and Social Change](#) Tricia Kress,2016-04-08 This volume features the works of scholar practitioners who embrace critical pedagogy and critical research as praxis in qualitative research about education The authors take an explicit stance toward social justice through education and they use critical research as a vehicle toward that end The chapters critically engage with topics such as researcher role and position in critical research collaborative research models with teachers and students exploring visual epistemology in schools and with students critical science education and cosmopolitanism and developing praxis within teacher preparation courses and teacher research Contributors push the boundaries of scholarship by presenting nuanced theoretical discussions or critical and timely educational issues via innovative forms of representation i e fiction narratives dialogues rich descriptions and visuals This book was originally published as a special issue of the International Journal of Qualitative Studies in Education
