Big Med David Dranove, Lawton R. Burns, 2024-05-31 There is little debate that health care in the United States is in need of reform But where should those improvements begin With insurers Drug makers The doctors themselves In Big Med David Dranove and Lawton Robert Burns argue that we re overlooking the most ubiquitous cause of our costly and underperforming system megaproviders the expansive health care organizations that have become the face of American medicine Your local hospital is likely part of one Your doctors too And the megaproviders are bad news for your health and your wallet Drawing on decades of combined expertise in health care consolidation Dranove and Burns trace Big Med s emergence in the 1990s followed by its swift rise amid false promises of scale economies and organizational collaboration In the decades since megaproviders have gobbled up market share and turned independent physicians into salaried employees of big bureaucracies while delivering on none of their early promises For patients this means higher costs and lesser care Meanwhile physicians report increasingly low morale making it all but impossible for most systems to implement meaningful reforms In Big Med Dranove and Burns combine their respective skills in economics and management to provide a nuanced explanation of how the provision of health care has been corrupted and

submerged under consolidation They offer practical recommendations for improving competition policies that would reform megaproviders to actually achieve the efficiencies and quality improvements they have long promised This is an essential read for understanding the current state of the health care system in America and the steps urgently needed to create an environment of better care for all of us **Guide Vert Boston et la Nouvelle Angleterre epub**
