Calendar Labs May 2015:

Tobacco Regulation, Economics, and Public Health, Volume I Samuel C. Hampsher-Monk, James E.

Prieger, Sudhanshu Patwardhan, 2024-05-30 The first volume of this three volume resource presents a historical analysis of the practice of smoking the rise and fall of the cigarette market and the successes and failures of tobacco control While taxes regulations and various behavioral and pharmacological interventions have helped many people to quit smoking they have not helped everyone The authors explain why these strategies alone are likely insufficient to elicit smoking cessation among the remaining group and why ramping up these strategies may also backfire Drawing on examples from the U S Australia Canada and the United Kingdom this volume introduces the technology of e cigarettes explaining the origins of the innovation patterns of use among consumers and the perception of e cigarettes among key stakeholder groups *In Search*

of Mary Shelley Fiona Sampson, 2018-06-05 We know the facts of Mary Shelley s life in some detail the death of her mother Mary Wollstonecraft within days of her birth the upbringing in the house of her father William Godwin in a house full of radical thinkers poets philosophers and writers her elopement at the age of seventeen with Percy Shelley the years of peripatetic travel across Europe that followed But there has been no literary biography written this century and previous books have ignored the real person what she actually thought and felt and why she did what she did despite the fact that Mary and her group of second generation Romantics were extremely interested in the psychological aspect of life In this probing narrative Fiona Sampson pursues Mary Shelley through her turbulent life much as Victor Frankenstein tracked his monster across the arctic wastes Sampson has written a book that finally answers the question of how it was that a nineteen year old came to write a novel so dark mysterious anguished and psychologically astute that it continues to resonate two centuries later No previous biographer has ever truly considered this question let alone answered it *"Code of*

Moving book history in a new direction this study examines publishers as brokers of Central Europe's political public sphere. They created international print markets, translated new texts, launched new journals, supported outspoken authors, and experimented with popular formats. Most of all, they contested censorship with finesse and resolve, thereby undermining the aim of Prussia and Austria to criminalize democratic thought. By packaging dissent through popular media, publishers cultivated broad readerships, promoted political literacy, and refashioned citizenship ideals. As political actors, intellectual midwives, and cultural mediators, publishers speak to a broad range of scholarly interests. Their outsized personalities, their entrepreneurial zeal, and their publishing achievements portray how print markets shaped the political world. The narrow perimeters of political communication in the late absolutist states of Prussia and Austria curtailed the open market of ideas. The publishing industry contested this information order, working both within and outside legal parameters to create a modern public sphere. Their expansion of print markets, their cat and mouse game with censors, and their ingenuity in packaging political commentary sheds light on the production and reception of dissent. Against the backdrop of censorship and police surveillance, the successes and failures of these citizens of print tell us much about nineteenth-century civil society and Central Europe's tortuous pathway to political modernization. Cutting across a range of disciplines, this study will engage social and political historians as well as scholars of publishing, literary criticism, cultural studies, translation, and the public sphere. The history of Central Europe's print markets between Napoleon and the era of unification doubles as a political tale. It sheds important new light on political communication and how publishers exposed German language readers to the Age of Democratic Revolution.

Computational Propaganda Samuel C. Woolley, Philip N. Howard, 2019

Social media platforms do not just circulate political ideas; they support manipulative disinformation campaigns. While some of these disinformation campaigns are carried out directly by individuals, most are waged by software commonly known as bots, programmed to perform simple, repetitive, robotic tasks. Some social media bots collect and distribute legitimate information, while others communicate with and harass people, manipulate trending algorithms, and inundate systems with spam. Campaigns made up of bots, fake accounts, and trolls can be coordinated by one person or a small group of people to give the illusion of large-scale consensus. Some political regimes use political bots to silence opponents and to push official state messaging to sway the vote during elections and to defame critics, human rights defenders, civil society groups, and journalists. This book argues that such automation and platform manipulation amounts to a new political communications mechanism that Samuel Woolley and Philip N. Howard call computational propaganda. This differs from older styles of propaganda in that it uses algorithms, automation, and human curation to purposefully distribute misleading information over social media networks while it actively learns from and mimics real people so as to manipulate public opinion across a diverse range of platforms and device networks. This book includes cases of computational propaganda from nine countries, both democratic and

authoritarian and four continents North and South America Europe and Asia covering propaganda efforts over a wide array of social media platforms and usage in different types of political processes elections referenda and during political crises
