The heart of California Design is the modern California home famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood, and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Homes were furnished with products from Heath Ceramics, Van Keppel Green, and Architectural Pottery, as well as other previously unheralded companies and designers. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors; lighting that was both task and ambient; bookshelves that served as room dividers; and bathing suits that would turn into ensembles appropriate for indoor entertainment. California Design includes 350 images, most in color, of furniture, ceramics, metalwork, architecture, graphic and industrial design, film, textiles, and fashion, and ten incisive essays that trace the rise of the California design aesthetic and fashion, and ten incisive essays that trace the rise of the California design aesthetic.

Jerry Camarillo Dunn, 2016. Provides information on accommodations, restaurants, sightseeing, outdoor activities, shopping, and entertainment. *Economy and Architecture*, Juliet Odgers, Mhairi McVicar, Stephen Kite, 2015-07-16. Economy and Architecture addresses a timely, critical, and much-debated topic in both its historical and contemporary dimensions. From the Apple Store in New York City to the street markets of the Pan American Highway, from commercial Dubai to the public schools of Australia, this book takes a critical look at contemporary architecture from across the globe whilst extending its range back in history as far as the Homeric epics of ancient Greece. The book addresses the challenges of practicing architecture within the strictures of contemporary economies grounded on the fundamental definition of economy as the well-managed household derived from the Greek *oikonomia* (*oikos* = house and *nemein* = manage). The diverse enquiries of the study are structured around the following key questions: How do we define our economies? How are the values of architecture negotiated among the various actors involved? How do we manage the production of a good architecture within any particular system? How does political economy frame and influence architecture? The majority of examples are taken from current or recent architectural practice; historical examples which include John Evelyn's villa, Blenheim Palace, John Ruskin's Venice, and early twentieth-century Paris place the debates within an extended critical perspective. Hispanic Serving Institutions, Christina Stearns, 2002 **Law in American History, Volume II**, G. Edward White, 2016-02-15. G. Edward White presents Law in American History, a two-volume comprehensive narrative history of American law from the colonial period to the

present In this second volume White explores the key turning points in roughly the second half of the American legal system from Reconstruction to the booming yet xenophobic 1920s Thought provoking and artfully written Law in American History Vol II is an essential text for both students of law and general readers alike **ID** ,1996 **Energy Research Abstracts** ,1987
