The Digital Age and Its Discontents Matteo Stocchetti, 2020-08-11 Three decades into the digital age the promises of emancipation of the digital revolution in education are still unfulfilled Furthermore digitalization seems to generate new and unexpected challenges for example the unwarranted influence of digital monopolies the radicalization of political communication and the facilitation of mass surveillance to name a few This volume is a study of the downsides of digitalization and the re organization of the social world that seems to be associated with it In a critical perspective technological development is not a natural but a social process not autonomous from but very much dependent upon the interplay of forces and institutions in society While influential forces seek to establish the idea that the practices of formal education should conform to technological change here we support the view that education can challenge the capitalist appropriation of digital technology and therefore the nature and direction of change associated with it This volume offers its readers intellectual prerequisites for critical engagement It addresses themes such as Facebook's response to its democratic discontents the pedagogical implications of algorithmic knowledge and quantified self as well as the impact of digitalization on academic profession Finally the book offers some elements to develop a vision of the role of education what should be done in education to address the concerns that new communication technologies seem to pose more risks than opportunities for freedom and democracy

Parenting for a Digital Future Sonia Livingstone, Alicia Blum-Ross, 2020-06-09 In the decades it takes to bring up a child parents face challenges that are both helped and hindered by the fact that they are living through a period of unprecedented digital innovation In *Parenting for a Digital Future* Sonia Livingstone and Alicia

Blum Ross draw on extensive and diverse qualitative and quantitative research with a range of parents in the UK to reveal how digital technologies characterize parenting in late modernity as parents determine how to forge new territory with little precedent or support They chart how parents often enact authority and values through digital technologies since screen time games and social media have become both ways of being together and of setting boundaries Parenting for a Digital Future moves beyond the panicky headlines to offer a deeply researched exploration of what it means to parent in a period of significant social and technological change

Digital Politics, Digital Histories, Digital Futures Adi Kuntsman, Liu Xin, 2023-05-23 Digital politics is rarely explored holistically and interdisciplinary beyond a focus on digital activism digital warfare or Internet governance Digital Politics Digital Histories Digital Futures addresses this gap initiating conversations about digital politics to a range of disciplines developing new pedagogy for the field

The Digital Future of English Simone Murray, 2025-07-18 More than any other academic discipline literary studies is the creation of print culture How then can it thrive in the digital era Early 1990s predictions of the book's imminent demise presented a simplistic either/or choice between the legacy of moribund print and triumphalist digital technology Yet we have grown to experience the two media as complexly interdependent and even complementary Clearly digital does not kill print But literary studies in the digital era cannot simply resume business as usual It is urgently necessary to reconsider the discipline's founding assumptions in light of digital technology The digital era prompts a rethinking of literary studies' object of study as well as its methods theories audiences and pedagogical practices What counts as literature necessarily shifts in an age of proliferating born digital texts and do it yourself DIY online publication Where should literary studies sit institutionally and how might it graft contextually oriented social sciences methods onto its traditionally humanistic mode of textual analysis Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book-loving publics has never been technologically easier Finally how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial age students Literary studies has been convulsed for decades by debates over electronic literature and more recently digitally aided distant reading But these discussions still mostly confine themselves to demarcating our proper object of study We need to think more expansively about digital technology's impact on the underpinning tenets of the discipline Literary Media Studies is pitched at fellow literary scholars book historians media theorists cultural sociologists digital humanists and those working at the interface of these converging disciplines It models constructive engagement with contemporary digital culture Most importantly it brings a burst of sorely needed optimism to the question of literary studies' digital future
