Of an Alien Homecoming Charles Bambach, 2022-07-01 Few themes resonate as powerfully in Heidegger as those connected to homecoming homeland and Heimat This emphasis plays out most powerfully in Heidegger's reading of Hölderlin and his turn towards language art and poetizing as a way of thinking through the poet's relevance in the epoch of homelessness and the abandonment of the gods As the first book length study in English of the Heidegger/Hölderlin relation *Of an Alien Homecoming* addresses the tension within Heidegger's work between his disastrous political commitments during the era of National Socialism and his attempts to open a path to a German future nurtured on Hölderlin's ideal of poetic dwelling Charles Bambach reads this work on Hölderlin from 1934-1948 in conversation with the *Black Notebooks* and Heidegger's metapolitics even as he uncovers an ethical dimension within Heidegger that pervades his reading of poetry Throughout all of these various stages on Heidegger's thought path Hölderlin remains the poet who poetizes the possibility of finding our lost home amidst the homelessness brought about in the epoch of technological thinking [Nature in the Middle Ages and the Early Modern Times](#) Albrecht Classen, 2024-07-01 The study of pre-modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre-modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches **The Black Mirror and Other Stories** Franz Rottensteiner, 2008-12-31 Handsomely equipped with a comprehensive introductory historical essay editor's notes and selected bibliography this distinguished anthology is a model of genre research These previously untranslated stories published from 1871 onward offer reading virtually unknown to most American and many German readers Some authors combine scientific and philosophical issues like Kurd Lasswitz in his witty tale *To the Absolute Zero of Existence* A Story from 2371 while others as in Erik Simon's 1983 title story pose psychological puzzles involving alien phenomena Though the earlier stories in particular demand painstaking reading all of them repay it with rewarding insights
