Fitz James O'Brien was an Irish American author and poet born in 1828. His short story *The Diamond Lens* exemplifies his talent for crafting imaginative and thought-provoking narratives that continue to captivate readers with their originality and creativity.

O'Brien endures because he was a remarkable writer. Remarkable indeed. He had a way of blending of hard fact with almost fanciful fantasy, juxtaposing technology and mysticism, creating convincing and scientific settings that play against the otherworldly romance. For all the weird fancifulness, these days O'Brien is read mostly as a successor to Poe; his work has qualities we now associate with science fiction. O'Brien clearly researched the field of microscopy before he wrote *The Diamond Lens*; it reads in places like hard SF.
