

The Dice Game

Three players A, B, and C play a game with a single die.

The rules of the game are:

- + Player A always goes first. A rolls the die. If the die lands showing a 1, then A wins the game. If A does not throw a 1, then B has a turn.
- + Player B rolls the die. If the die lands showing a 2 or 3, then B wins the game. If B does not throw a 2 or 3, then C has a turn.
- + Player C rolls the die. If the die lands showing a 4, 5, or 6, then C wins the game. If C does not throw a 4, 5, or 6, then A starts again.

This procedure continues until there is a winner.

INVESTIGATE

1. Determine a **hypothesis** about who may be the most likely winner (based on the reading of the rules, not on any actual calculations)
2. The **probabilities** of each player (A, B, and C) winning the game
NOTE: Calculate the probabilities with their first roll only!
3. Who will be the **most likely winner**? (based on your calculations from part two)
4. What is the **most likely length of the game** in terms of the number of rolls of the dice?

NOTE: You may need to calculate new probabilities for each player as they may have a second roll of the die.

HINT: When do you stop calculating?!

Thinking/Inquiry Problems Solving – predict the most likely winner and the most likely length of the game			
- Communicates a detailed understanding of probability concepts - Has evidence of an initial hypothesis - Conclusions are made based on the supporting evidence	- Communicates some understanding of probability concepts - A hypothesis is made predicting who will win the game - Conclusions are made based on data collected	- Communicates some understanding of probability concepts - A hypothesis is made predicting who will win the game that refers to knowledge of probability - Data trends are made based on data collected and empirical probability	- Communicates a thorough understanding of probability concepts - A hypothesis is made predicting who is most likely to win that is justifying knowledge of probability - Evidence is offered as to who the probabilities are for all the game - Conclusions are made based on data collected, empirical and theoretical probabilities
Communications – solutions presented clearly with full mathematical reasoning			
- Communicates with kind and clarity - Has a results of data collected and tested	- Communicates with some clarity - Has results of data collected and tested	- Communicates with some clarity - Results are presented in a clear, tabular way	- Communicates with a high degree of clarity - Results are presented in a clear, tabular way and linked with other students' results
Knowledge Application – determine the theoretical/experimental probability of each player winning the game			
- Determines the experimental probability but is unable to compare the theoretical probability - It states the length of a game based on data collected	- Determines the experimental probability and theoretical probability in a way that demonstrates some understanding of the concepts - Predicts the length of a game based on data collected with	- Determines the experimental probability and theoretical probability in a way that demonstrates some understanding of the concepts - It states the average length of the game from data collected	- Determines the experimental probability and theoretical probability in a way that demonstrates a thorough understanding of the concepts - Uses a comparison to moderate results of the game - Calculates the average length of the game from data collected with justification
