Catastrophism The Apocalyptic Politics Of Collapse And Rebirth Spectre:

Catastrophism Sasha Lilley, David McNally, Eddie Yuen, James Davis, 2012-10-05 We live in catastrophic times The world is reeling from the deepest economic crisis since the Great Depression with the threat of further meltdowns ever looming Global warming and myriad dire ecological disasters worsen with little if any action to halt them their effects rippling across the planet in the shape of almost biblical floods fires droughts and hurricanes Governments warn that there is no alternative to the bitter medicine they prescribe or risk devastating financial or social collapse The right whether religious or secular views the present as catastrophic and wants to turn the clock back The left fears for the worst but hopes some good will emerge from the rubble Visions of the apocalypse and predictions of impending doom abound Across the political spectrum a culture of fear reigns *Catastrophism* explores the politics of apocalypse on the left and right in the environmental movement and examines why the lens of catastrophe can distort our understanding of the dynamics at the heart of these numerous disasters and fatally impede our ability to transform the world Lilley McNally Yuen and Davis probe the reasons why catastrophic thinking is so prevalent and challenge the belief that it is only out of the ashes that a better society may be born The authors argue that those who care about social justice and the environment should jettison doomsaying even as it relates to indisputably apocalyptic climate change Far from calling people to arms they suggest catastrophic fear often results in passivity and paralysis and at worst reactionary politics

Catastrophism Sasha Lilley, David McNally, Eddie Yuen, 2012-10-26 Amid a global zeitgeist of impending catastrophe this book explores the culture of fear so prevalent in today's politics economic climate and religious extremism The authors of this collection argue that the lens of catastrophe through which so many of today's issues are examined distorts understanding of the dynamics at the heart of numerous problems such as global warming ultimately halting progress and transformation Arguing that catastrophic thinking results in paralysis or reactionary politics the authors posit that the myths of 2012 have negative affects across the political spectrum and urge activists not to give up their beliefs and instead focus on working on issues now instead of waiting until society has ended and needs to be rebuilt

Anthropocene or Capitalocene? Jason W. Moore, 2016-06-01 The Earth has reached a tipping point Runaway climate change the sixth great extinction of planetary life the acidification of the oceans all point toward an era of unprecedented turbulence in humanity's relationship within the web of life But just what is that relationship and how do we make sense of this extraordinary transition Anthropocene or Capitalocene offers answers to these questions from a dynamic group of leading critical scholars They challenge the theory and history offered by the most significant environmental concept of our times the Anthropocene But are we living in the Anthropocene literally the Age of Man Is a different response more compelling and better suited to the strange and often terrifying times in which we live The contributors to this book diagnose the problems of Anthropocene thinking and propose an alternative the global crises of the twenty first century are rooted in the Capitalocene the Age of Capital Anthropocene or Capitalocene offers a series of

provocative essays on nature and power humanity and capitalism Including both well established voices and younger scholars the book challenges the conventional practice of dividing historical change and contemporary reality into Nature and Society demonstrating the possibilities offered by a more nuanced and connective view of human environment making joined at every step with and within the biosphere In distinct registers the authors frame their discussions within a politics of hope that signal the possibilities for transcending capitalism broadly understood as a world ecology that joins nature capital and power as a historically evolving whole Contributors include Jason W Moore Eileen Crist Donna J Haraway Justin McBrien Elmar Altvater Daniel Hartley and Christian Parenti

Abolishing Fossil Fuels Kevin A. Young, 2024-05-14 Climate destruction is a problem of political power We have the resources for a green transition but how can we neutralize the influence of Exxon and Shell Abolishing Fossil Fuels argues that the climate movement has started to turn the tide against fossil fuels just too gradually The movement's partial victories show us how the industry can be further undermined and eventually abolished Activists have been most successful when they've targeted the industry's enablers the banks insurers and big investors that finance its operations the companies and universities that purchase fossil fuels and the regulators and judges who make life and death rulings about pipelines power plants and drilling sites This approach has jeopardized investor confidence in fossil fuels leading the industry to lash out in increasingly desperate ways The fossil fuel industry's financial and legal enablers are also its Achilles heel The most powerful movements in US history succeeded in similar ways The book also includes an in depth analysis of four classic victories the abolition of slavery battles for workers rights in the 1930s Black freedom struggles of the 1950s and 1960s and the fight for clean air Those movements inflicted costs on economic elites through strikes boycotts and other mass disruption They forced some sectors of the ruling class to confront others which paved the way for victory Electing and pressuring politicians was rarely the movements primary focus Rather gains in the electoral and legislative realms were usually the byproducts of great upsurges in the fields factories and streets Those historic movements show that it's very possible to defeat capitalist sectors that may seem invulnerable They also show us how it can be done They offer lessons for building a multiracial working class climate movement that can win a global green transition that's both rapid and equitable

Stop, Thief! Peter Linebaugh, 2014-03-01 In this majestic tour de force celebrated historian Peter Linebaugh takes aim at the thieves of land the polluters of the seas the ravagers of the forests the despoilers of rivers and the removers of mountaintops Scarcely a society has existed on the face of the earth that has not had commoning at its heart Neither the state nor the market say the planetary commoners These essays kindle the embers of memory to ignite our future commons From Thomas Paine to the Luddites from Karl Marx who concluded his great study of capitalism with the enclosure of commons to the practical dreamer William Morris who made communism into a verb and advocated communizing industry and agriculture to the 20th century communist historian E P Thompson Linebaugh brings to life the vital commonist tradition He traces the red thread from the great revolt of commoners in 1381 to the enclosures of

Ireland and the American commons where European immigrants who had been expelled from their commons met the immense commons of the native peoples and the underground African American urban commons Illuminating these struggles in this indispensable collection Linebaugh reignites the ancient cry STOP THIEF Future on Fire David Camfield,2022-10-11 Climate change is already affecting millions of people Governments talk about taking action to limit global heating to 2 degrees Celsius above pre industrial levels but the greenhouse gas emissions allowed by their policies have the Earth on track to heating far more than that by the end of the century a level of heating that will have truly disastrous consequences Visionary plans for how to slash emissions and make society better at the same time abound including various Green New Deals But how can we make the changes that are so urgently needed Future on Fire argues that a just transition from fossil fuels and other drivers of climate change will not be delivered by businesspeople or politicians that support the status quo Nor will electing green left leaders be enough to overcome the opposition of capitalists and state bureaucrats Only the power of disruptive mass social movements has the potential to force governments to make the changes we need so supporters of climate justice should commit to building them Confronting the question what if heating above 2 degrees becomes unavoidable and refusing to despair David Camfield argues that even a ravaged planet is worth fighting for and that ultimately the only solution to the ecological crisis created by capitalism is a transition to ecosocialism Living in the Shadow of the Cross Paul Kivel,2013-10-01 How our dominant Christian worldview shapes everything from personal behavior to public policy and what to do about it Over the centuries Christianity has accomplished much which is deserving of praise Its institutions have fed the hungry sheltered the homeless and advocated for the poor Christian faith has sustained people through crisis and inspired many to work for social justice Yet although the word Christian connotes the epitome of goodness the actual story is much more complex Over the last two millennia ruling elites have used Christian institutions and values to control those less privileged throughout the world The doctrine of Christianity has been interpreted to justify the killing of millions and its leaders have used their faith to sanction participation in colonialism slavery and genocide In the Western world Christian influence has inspired legislators to continue to limit women s reproductive rights and has kept lesbians and gays on the margins of society As our triple crises of war financial meltdown and environmental destruction intensify it is imperative that we dig beneath the surface of Christianity s benign reputation to examine its contribution to our social problems Living in the Shadow of the Cross reveals the ongoing everyday impact of Christian power and privilege on our beliefs behaviors and public policy and emphasizes the potential for people to come together to resist domination and build and sustain communities of justice and peace Paul Kivel is the award winning author of Uprooting Racism and the director of the Christian Hegemony Project He is a social justice activist and educator who has focused on the issues of violence prevention oppression and social justice for over forty five years **Men in Prison** Victor Serge,2014-04-01 Everything in this book is fictional and everything is true wrote Victor Serge in the epigraph to Men in

Prison I have attempted through literary creation to bring out the general meaning and human content of a personal experience The author of *Men in Prison* served five years in French penitentiaries 1912-1917 for the crime of criminal association in fact for his courageous refusal to testify against his old comrades the infamous Tragic Bandits of French anarchism While I was still in prison Serge later recalled fighting off tuberculosis insanity depression the spiritual poverty of the men the brutality of the regulations I already saw one kind of justification of that infernal voyage in the possibility of describing it Among the thousands who suffer and are crushed in prison and how few men really know that prison I was perhaps the only one who could try one day to tell all There is no novelist's hero in this novel unless that terrible machine prison is its real hero It is not about me about a few men but about men all men crushed in that dark corner of society Ironically Serge returned to writing upon his release from a GPU prison in Soviet Russia where he was arrested as an anti-Stalinist subversive in 1928 He completed *Men in Prison* and two other novels in semi-captivity before he was rearrested and deported to the Gulag in 1933 Serge's classic prison novel has been compared to Dostoyevsky's *House of the Dead* Koestler's *Spanish Testament* Genet's *Miracle of the Rose* and Solzhenitsyn's *One Day in the Life of Ivan Denisovich* both for its authenticity and its artistic achievement This edition features a substantial new introduction by translator Richard Greeman situating the work in Serge's life and times

Patriarchy of the Wage Silvia Federici, 2021-08-24 At a time when we are witnessing a worldwide expansion of capitalist relations a feminist rethinking of Marx's work is vitally important In *Patriarchy of the Wage* Silvia Federici bestselling author and the most important Marxist feminist of our era asks why Marx's crucial analysis of the exploitation of human labor was blind to women's work and struggle on the terrain of social reproduction Why was Marx unable to anticipate the profound transformations in the proletarian family that took place at the turn of the nineteenth century creating a new patriarchal regime *Patriarchy of the Wage* does more than just redefine classical Marxism It is an urgent call for a new kind of radical politics

Birth of Our Power Victor Serge, 2015-01-01 *Birth of Our Power* is an epic novel set in Spain France and Russia during the heady revolutionary years 1917-1919 Serge's tale begins in the spring of 1917 the third year of mass slaughter in the blood and rain soaked trenches of World War I When the flames of revolution suddenly erupt in Russia and Spain Europe is burning at both ends Although the Spanish uprising eventually fizzles in Russia the workers peasants and common soldiers are able to take power and hold it Serge's tale of two cities is constructed from the opposition between Barcelona the city we could not take and Petrograd the starving beleaguered capital of the Russian Revolution besieged by counter-revolutionary Whites Between the romanticism of radicalized workers awakening to their own power in a sun-drenched Spanish metropolis to the grim reality of workers clinging to power in Russia's dark frozen revolutionary outpost From victory in defeat to defeat in victory The novel was composed a decade after the revolution in Leningrad where Serge was living in semicaptivity because of his declared opposition to Stalin's dictatorship over the revolution
