ophthalmology has been thoroughly revised and updated to reflect the changes in practice that have taken place since it was first published in 2009. In recent years an increasing variety of health professionals have been involved with the care of ophthalmic patients. The aim has been to provide an efficient high quality and cost effective service to patients which utilises the skills of the multidisciplinary ophthalmic team. This study guide offers both a basic introduction and a skills escalator for nurses and other health professionals. Those who make use of its content and use the To do panels for reflection and research will develop their knowledge and skills more quickly and acquire good habits of self assessment and self directed learning. The simple questions at the end of each chapter can be used for self testing or as a basis for questions that mentors can ask their students. The content is deliberately restricted to the basics in terms of the areas chosen though they are all covered in reasonable depth. Students are encouraged to use the skills checklists at the end of the book to document their personal progress and validate their developing practice. These will provide useful evidence for annual performance appraisals.

Comprehensive guide to latest techniques in vitreoretinal surgery. Covers numerous retinal disorders. Paediatric retinal surgery covered. Includes more than 400 clinical photographs, diagrams and tables. *Current Developments in Glaucoma Surgery and MIGS* J.R. Samples, I.I.K. Ahmed, 2020-01-02. Successful interventional glaucoma remains a sought after goal for the glaucoma clinician for many reasons. Medical costs, compliance and adherence remain major barriers for the treatment of our patients. A truly definitive treatment for glaucoma is most likely to be largely surgical as it is doubtful that patients will continue to use glaucoma drugs in the future for anything other than transient lowering of intraocular pressure. In the coming era it seems probable that neuroprotection and neurorestoration will be combined with MIGS to lower pressure. The different types of MIGS are increasing in proportion to their efficacy. To date there are no fewer than 12 choices available to glaucoma specialists. Choice of procedure depends on the underlying anatomy as well as the patient's individual characteristics. Truthfully the number of available surgeries depends upon their taxonomy. Most are based on the outflow system and the canal as illustrated in this book.
