James Bond - The Secret History Sean Egan,2016-02-25 James Bond entered the world in 1953 with the novel Casino Royale by Ian Fleming Since then the British secret agent codenamed 007 has become the biggest media phenomenon of the modern age surpassing and outlasting previous cultural icons such as Sherlock Holmes Tarzan and The Saint Bond has conquered all forms of media from books films and radio to comic strips and video games while inspiring a tidal wave of merchandise and a legion of imitators Although the world has changed almost beyond recognition since his debut his continuing relevance is affirmed by the multiple generations who have thrilled to his exploits This book for the first time provides the full enthralling story of how the espionage fantasies of a rather melancholy journalist came to captivate the world It exposes the setbacks behind the triumphs from Fleming s increasing boredom with his own creation to regular crises over re casting of the cinematic Bond and legal battles in the 1990s that almost destroyed the film franchise With the help of Bond scholars Fleming intimates Bond film crew and others James Bond The Secret History shows how the man with the Licence to Kill overcame every hurdle to become the greatest fantasy hero of all time With a foreword by Jeremy Duns

Double-booked: Effects of overlap between school and farming calendars on education and child labor Allen IV, James, 2024-02-12 Across sub Saharan Africa countries with a greater percentage of overlapping days in their school and farming calendars also have lower primary school survival rates In theory greater overlap between the school and farming calendars should indeed reduce schooling investments and farm based child labor too as it constrains the time allocation opportunity set for both productive activities I causally identify such effects by leveraging a four month shift to the school calendar in Malawi that exogenously changed the number of days that the school calendar overlapped with specific crop calendars which differentially affected communities based on their pre policy crop allotments Using panel data for school aged children I find that a 10 day increase in school calendar overlap during peak farming periods significantly decreases school advancement by 0.34 grades one lost grade for every three children and the share of children engaged in peak period household farming by 11 percentage points after four years Secondary analyses reveal stronger negative schooling impacts for girls and poorer households driven by overlap with the labor intensive planting period A policy simulation illustrates that adapting the school calendar to minimize overlap with peak farming periods is a highly cost effective educational intervention to increase school participation by better accommodating farm labor demand *Handy-book of Rules and Tables for Verifying Dates with the Christian Era* John James Bond, 1875
