Category 5 Judith A. Howard, Ernest Zebrowski, 2010-03-11 the authors sound a pessimistic note about society's short term memory in their sobering able history of Camille Booklist This highly readable account aimed at a general audience excels at telling the plight of the victims and how local political authorities reacted The saddest lesson is how little the public and the government learned from Camille Highly recommended for all public libraries especially those on the Gulf and East coasts Library Journal online As the unsettled social and political weather of summer 1969 played itself out amid the heat of antiwar marches and the battle for civil rights three regions of the rural South were devastated by the horrifying force of Category 5 Hurricane Camille Camille's nearly 200 mile per hour winds and 28 foot storm surge swept away thousands of homes and businesses along the Gulf Coast of Louisiana and Mississippi Twenty four oceangoing ships sank or were beached six offshore drilling platforms collapsed 198 people drowned Two days later Camille dropped 108 billion tons of moisture drawn from the Gulf onto the rural communities of Nelson County Virginia nearly three feet of rain in 24 hours Mountainsides were washed away quiet brooks became raging torrents homes and whole communities were simply washed off the face of the earth In this gripping account Ernest Zebrowski and Judith Howard tell the heroic story of America's forgotten rural underclass coping with immense adversity and inconceivable tragedy Category 5 shows through the riveting stories of Camille's victims and survivors the disproportionate impact of natural disasters on the nation's poorest communities It is ultimately a story of the lessons learned and in some cases tragically unlearned from that storm hard lessons that were driven home once again in the awful wake of Hurricane Katrina Emergency responses to Katrina were uncoordinated slow and at least in the early days woefully inadequate Politicians argued about whether there had been one disaster or two as if that mattered And before the last survivors were even evacuated a flurry of finger pointing had begun The question most neglected was What is the shelf life of a historical lesson Ernest Zebrowski is founder of the doctoral program in science and math education at Southern University a historically black university in Baton Rouge Louisiana and Professor of Physics at Pennsylvania State University's Pennsylvania College of Technology His previous books include *Perils of a Restless Planet Scientific Perspectives on Natural Disasters* Judith Howard earned her Ph D in clinical social work from UCLA and writes a regular political column for the Ruston Louisiana Morning Paper Category 5 examines with sensitivity the overwhelming challenges presented by the human and physical impacts from a catastrophic disaster and the value of emergency management to sound decisions and sustainability John C Pine Chair Department of Geography Anthropology and Director of Disaster Science Management Louisiana State University *Hurricane Katrina and the Forgotten Coast of Mississippi* Susan L. Cutter, 2014-04-07 An interdisciplinary volume on impacts of and recovery from Hurricane Katrina in southern Mississippi for natural hazard researchers students and policy makers [America's Downward Spiral](#) Jerome G. Manis, 2008-01-16 Americas Downward Spiral A Call for Action offers a well documented explanation and solutions for many

contemporary troubles Some have similar causes and interconnections The recent collapse of a Minneapolis bridge has links to shortages of American engineers scientists and teachers Both are interconnected with serious unfairness in our system of justice The book examines Americas failure to adapt to a rapidly changing world Examples are the many disasters that began the twenty first century and their causes Among them were the year 2000 stock market crash the 9 11 planes that destroyed the World Trade Center killing thousands of Americans the endless Afghanistan and Iraq wars and many others The roots of those disasters are traceable to long outdated institutions and practices Among them is our federal system that has had scant responsibility for our infrastructure such as that Minnesota bridge Its other outcomes include forty million people without any health insurance It also is why our schools keep American children within the lowest test score rankings and highest dropout rates in the modern world Other serious troubles include our military industrial complex about which President Eisenhower warned us but is far more powerful today than it was over fifty years ago Another is the failing of our media to inform us of these and other national shortcomings Nor are we informed about the ongoing massive frauds that are not treated as crimes In order to overcome our downward spiral we must choose political leaders who understand what is needed They must be knowledgeable and especially to be ready to create new polices for avoiding war protecting the environment unifying our national system and promoting a fairer system of justice **Deep Delta Justice** Matthew Van

Meter,2020-07-28 The book that inspired the documentary A Crime on the Bayou 2021 Chautauqua Prize Finalist The arresting astonishing history of one lawyer and his defendant who together achieved a civil rights milestone Justin Driver In 1966 in a small town in Louisiana a 19 year old black man named Gary Duncan pulled his car off the road to stop a fight Duncan was arrested a few minutes later for the crime of putting his hand on the arm of a white child Rather than accepting his fate Duncan found Richard Sobol a brilliant 29 year old lawyer from New York who was the only white attorney at the most radical law firm in New Orleans Against them stood one of the most powerful white supremacists in the South a man called simply The Judge In this powerful work of character driven history journalist Matthew Van Meter vividly brings alive how a seemingly minor incident brought massive systemic change to the criminal justice system Using first person interviews in depth research and a deep knowledge of the law Van Meter shows how Gary Duncan s insistence on seeking justice empowered generations of defendants disproportionately poor and black to demand fair trials Duncan v Louisiana changed American law but first it changed the lives of those who litigated it **A Furious Sky** Eric Jay Dolin,2020-08-04 Washington Post 50 Notable Works of Nonfiction in 2020 Finalist Kirkus Prize for Nonfiction Kirkus Reviews Best Nonfiction Books of 2020 Library Journal Best Science Technology Books of 2020 Booklist 10 Top Sci Tech Books of 2020 New York Times Book Review Editor s Choice With A Furious Sky best selling author Eric Jay Dolin tells the history of America itself through its five hundred year battle with the fury of hurricanes In this compelling chronicle New York Times Book Review Eric Jay Dolin tells the history of America through its battles with hurricanes Weaving together tales of tragedy and folly of heroism and

scientific progress best selling author Eric Jay Dolin shows how hurricanes have time and again determined the course of American history from the nameless storms that threatened the New World voyages to our own era of global warming and megastorms Along the way Dolin introduces a rich cast of unlikely heroes and forces us to reckon with the reality that future storms will likely be worse unless we reimagine our relationship with the planet

Dynamics of Disaster Barbara Allen, Rachel A. Dowty Beech, 2013-09-13 Disasters are the result of complex interactions between social and natural forces acting at multiple scales from the individual and community to the organisational national and international level Effective disaster planning response and recovery require an understanding of these interacting forces and the role of power knowledge and organizations This book sheds new light on these dynamics and gives disaster scholars and practitioners new and valuable lessons for management and planning in practice The authors draw on methods across the social sciences to examine disaster response and recovery as viewed by those in positions of authority and the recipients of operations These first two sections examine cases from Hurricane Katrina while the third part compares this to other international disasters to draw out general lessons and practical applications for disaster planning in any context The authors also offer guidance for shaping institutional structures to better meet the needs of communities and residents

Playing Politics with Natural Disaster Timothy W. Kneeland, 2020-04-15 Hurricane Agnes struck the United States in June of 1972 just months before a pivotal election and at the dawn of the deindustrialization period across the Northeast The response by local state and national officials had long term consequences for all Americans President Richard Nixon used the tragedy for political gain by delivering a generous relief package to the key states of New York and Pennsylvania in a bid to win over voters After his landslide reelection in 1972 Nixon cut benefits for disaster victims and then passed legislation to push responsibility for disaster preparation and mitigation on to states and localities The impact led to the rise of emergency management and inspired the development of the Federal Emergency Management Agency FEMA With a particular focus on events in New York and Pennsylvania Timothy W Kneeland narrates how local state and federal authorities responded to the immediate crisis of Hurricane Agnes and managed the long term recovery The impact of Agnes was horrific as the storm left 122 people dead forced tens of thousands into homelessness and caused billions of dollars in damage from Florida to New York In its aftermath local officials and leaders directed disaster relief funds to rebuild their shattered cities and reshaped future disaster policies Playing Politics with Natural Disaster explains how the political decisions by local state and federal officials shaped state and national disaster policy and continues to influence emergency preparedness and response to this day

Weather Matters Bernard Mergen, 2008 A kaleidoscopic book that illuminates our obsession with weather as both physical reality and evocative metaphor focusing on the ways in which it is perceived feared embraced managed and even marketed

Camille, 1969 Mark M. Smith, 2011-05 Thirty six years before Hurricane Katrina ravaged New Orleans and

southern Mississippi the region was visited by one of the most powerful hurricanes ever to hit the United States Camille Mark M Smith offers three highly original histories of the storm s impact in southern Mississippi In the first essay Smith examines the sensory experience and impact of the hurricane how the storm rearranged and challenged residents senses of smell sight sound touch and taste The second essay explains the way key federal officials linked the question of hurricane relief and the desegregation of Mississippi s public schools Smith concludes by considering the political economy of short and long term disaster recovery returning to issues of race and class Camille 1969 offers stories of survival and experience of the tenacity of social justice in the face of a natural disaster and of how recovery from Camille worked for some but did not work for others Throughout these essays are lessons about how we might learn from the past in planning for recovery from natural disasters in the future
