Perl Template Toolkit Darren Chamberlain,Dave Cross,Andy Wardley,2003-12-23 Among the many different approaches to templating with Perl such as Embperl Mason HTML Template and hundreds of other lesser known systems the Template Toolkit is widely recognized as one of the most versatile Like other templating systems the Template Toolkit allows programmers to embed Perl code and custom macros into HTML documents in order to create customized documents on the fly But unlike the others the Template Toolkit is as facile at producing HTML as it is at producing XML PDF or any other output format And because it has its own simple templating language templates can be written and edited by people who don't know Perl In short the Template Toolkit combines the best features of its competitors with ease of use and flexibility resulting in a technology that's fast powerful and extensible and ideally suited to the production and maintenance of web content and other dynamic document systems In Perl Template Toolkit you'll find detailed coverage of this increasingly popular technology Written by core members of the technology's development team the book guides you through the entire process of installing configuring using and extending the Template Toolkit It begins with a fast paced but thorough tutorial on building web content with the Template Toolkit and then walks you through generating and using data files particularly with XML It also provides detailed information on the Template Toolkit's modules libraries and tools in addition to a complete reference manual Topics in the book include Getting started with the template toolkit The Template language Template directives Filters Plugins Extending the Template Toolkit Accessing databases XML Advanced static web page techniques Dynamic web content and web applications The only book to cover this important tool Perl Template Toolkit is essential reading for any Perl programmer who wants to create dynamic web content that is remarkably easy to maintain This book is your surefire guide to implementing this fast flexible and powerful templating system **The Cat in the Hat 60th**
