Boom Chain - Inspect/ Lubricate

Note: The information that follows will only relate to machines that have a three-section boom.

1. Remove the boom extension chain and boom retraction chain. The boom extension chain and boom retraction chain must be removed from the boom for inspection. After removal, measure the chains for wear. Chains which are serviceable must be lubricated before re-installing the chains. For the correct procedures, refer to the Hydraulic System Systems Operation, Testing and Adjusting, "Boom Chain - Clean/Inspect/Lubricate" or refer to your Caterpillar dealer for details.

Boom Chain Tension -Check/ Adjust

NEUTRAL

You must read the warnings and instructions which are contained in the safety section of this manual. Before you perform any operation or maintenance procedures ensure you understand the warnings and instructions.

Check Condition

1. Park the machine on level ground. Fully retract the boom and lower the boom.
2. Remove the cover from the rear of the chains.
3. A limited inspection of the chains can be made through the rear of the boom. The boom extension chain can be inspected by fully extending the boom and looking on top of the intermediate section. If the chains are corroded, the chains must be removed from the boom for cleaning and a full inspection. If the chains require lubricant, the chains must be removed from the boom for cleaning and a full inspection. Refer to the Hydraulic System Systems Operation, Testing and Adjusting, "Boom Chain - Clean/Inspect/Lubricate" or consult your Caterpillar dealer.

4. Install the cover on the rear of the boom.

Check and Adjust the Chain Tension

1. Slacken the extension chain and the retraction chain slightly. Raise the boom to the maximum angle and retract the boom. This ensures that all sections of the boom are fully retracted. If the retraction chain requires adjustment and the boom is returned to a lowered position, all the sections will not fully retract.

WARNING

The boom can fall if a control is moved or if a hydraulic component fails. This can cause personal injury or death. Support the boom with stands. Do not rely on the cylinder to hold the boom up.

2. Lower the boom to the horizontal position and install a suitable stand under the first section in order to prevent the boom from falling unexpectedly. To properly support the boom, use the following tools:

Item 1:

Required Tools		
Part Number	Description	Quantity
45-7641	Tube	1
45-0486	Stand	1
45-7615	Pin	1
45-7625	Cable	1
45-0498	Swivel	1

3. Lower the boom to a position just above the stand and stop the engine.
