Cataloging and Classification Gretchen L. Hoffman, Karen Snow, 2021-11-24
 The cataloging and classification field is changing rapidly New concepts and models such as linked data identity management the IFLA Library Reference Model and the latest revision of Resource Description and Access RDA have the potential to change how libraries provide access to their collections To prepare library and information science LIS students to be successful cataloging practitioners in this changing landscape they need a solid understanding of fundamental cataloging concepts standards and practices their history where they stand currently and possibilities for the future The chapters in Cataloging and Classification Back to Basics are meant to complement textbooks and lectures so students can go deeper into specific topics New and well seasoned library practitioners will also benefit from reading these chapters as a way to refresh or fill gaps in their knowledge of cataloging and classification The chapters in this book were originally published as a special issue of the journal Cataloging Classification Quarterly

American Reference Books Annual Juneal M. Chenoweth, 2019-06-24 Read professional fair reviews by practicing academic public and school librarians and subject area specialists that will enable you to make the best choices from among the latest reference resources This newest edition of American Reference Books Annual ARBA provides librarians with insightful critical reviews of print and electronic reference resources released or updated in 2017 2018 as well as some from 2019 that were received in time for review in the publication By using this invaluable guide to consider both the positive and negative aspects of each resource librarians can make informed decisions about which new reference resources are most appropriate for their collections and their patrons needs Collection development librarians who are working with limited budgets as is the case in practically every library today will be able to maximize the benefit from their monetary resources by selecting what they need most for their collection while bypassing materials that bring limited value to their specific environment

Organizing Library Collections Gretchen L. Hoffman, 2019-08-05 Libraries organize their collections to help library users find what they need Organizing library collections may seem like a straightforward and streamlined process but it can be quite complex and there is a large body of theory and practice that shape and support this work Learning about the organization of library collections can be challenging Libraries have a long history of organizing their collections there are many principles models standards and tools used to organize collections and theory and practice are changing constantly Written for beginning library science students Organizing Library Collections Theory and Practice introduces the theory and practice of organizing library collections in a clear straightforward and understandable way It explains why and how libraries organize their collections and how theory and practice work together to help library users It introduces basic cataloging and metadata theory describes and evaluates the major cataloging and metadata standards and tools used to organize library collections and explains in general how all libraries organize their collections in practice Yet this book not only introduces theory and practice in general it introduces students to a wide range of topics involved in organizing library collections This book

explores how academic public school and special libraries typically organize their collections and why It also discusses standardization and explains how cataloging and metadata standards and policies are developed Ethical issues also are explored and ethical decision making is addressed In addition several discussion questions and class activities reinforce concepts introduced in each chapter Students should walk away from this book understanding why and how libraries organize their collections
