## CHAPTER 9

### Section 3: Cell Cycle Regulation

In your textbook, read about the abnormal cell cycle and cancer.

Complete the graphic organizer about the causes and prevention of cancer. These terms may be used more than once: carcinogens, cell cycle, cells, DNA damage, genetic changes, spindle fiber failure, the Sun's ultraviolet rays, tobacco.

Complete the table by checking the correct column for each description.

| Description                                                                                                     | Apoptosis | Stem Cells |
|-----------------------------------------------------------------------------------------------------------------|-----------|------------|
| 9. After a sperm fertilizes an egg, the resulting mass of cells divides until there are about 100 to 150 cells. |           |            |
| 10. Some cells go through a programmed death.                                                                   |           |            |
| 11. Embryonic cells shrivel and die, resulting in the formation of fingers and toes.                            |           |            |
| 12. Unspecialized cells are either embryonic or adult.                                                          |           |            |
| 13. This event occurs in cells that are damaged beyond repair.                                                  |           |            |
