

Lesson 2.1 Residential Design

Preface

Effective residential design requires a wide range of knowledge and skills. Successful designers understand and apply a variety of systems, from the structural and mechanical systems to the electrical, plumbing, and communication systems. They also understand the needs of the client, the community, and the environment. They are able to create a design that is both functional and aesthetically pleasing. They are also able to work with a variety of materials and construction techniques. They are able to create a design that is both functional and aesthetically pleasing. They are also able to work with a variety of materials and construction techniques.

In order to create an efficient and cost-effective building, the designer must understand the building systems and structures. This includes understanding the structural, mechanical, electrical, plumbing, and communication systems. The designer must also understand the needs of the client, the community, and the environment. They are able to create a design that is both functional and aesthetically pleasing. They are also able to work with a variety of materials and construction techniques.

During the design process, the designer will work with a variety of professionals, including architects, engineers, and contractors. They will also work with the client to understand their needs and expectations. The designer will create a design that is both functional and aesthetically pleasing. They will also create a design that is both functional and aesthetically pleasing. They will also create a design that is both functional and aesthetically pleasing.

Learning Objectives

1. The student will understand the potential of the property and the needs of the client.
2. The student will understand the needs of the client and the community.
3. The student will understand the needs of the client and the community.
