Celebrating Irving Fisher The Legacy Of A Great Economist:

Celebrating Irving Fisher Roger W. Dimand, John Geanakoplos, 2005-04-08 Irving Fisher 1867 1947 economist Yale University teacher inventor mathematician and activist reformer was one of the most important American economists of the first half of the 20th century On the 50th anniversary of his death in May of 1998 a large gathering of economists met at Yale to reassess Fisher's enormous scientific contribution Such a reevaluation was facilitated by welcomed republication of all of Fisher's books and articles in 14 volumes the previous year The offices of the Cowles Foundation at Yale University were made available for the presentations and the Cowles Foundation directors and administrators assisted with the preparation of this important volume This book consists of original papers explaining Fisher's technical contributions to econometrics a reassessment of his prescient and much neglected textbook on economics his theories of capital and interest his debt deflation theory of depression the various financial devices that he developed to improve governance and policy making and finally his eugenic crusades that included the prohibition of alcoholic beverages and healthy diets Fisher's ideas were so advanced for his time that many of the contributors to these volumes delight in pointing out how the recent financial inventions in the world economy are catching up to the insights that Fisher provided decades earlier This volume consists of the major papers from that conference including written versions of the comments that were presented at that time The contributions include original essays by Nobel Laureate James Tobin Other contributions include analytic essays by distinguished economists such as A J Auerbach William J Barber W C Brainard W E Diewert Robert Dimand Victor R Fuchs John Geanakoplos M J Graetz Robert E Hall William D Nordhaus Peter C B Phillips John Rust Herbert E Scarf M D Shapiro J B Shoven Robert J Shiller Martin Shubik T N Srinivasan John Whalley and others In addition the editors have included several already published biographical essays on Fisher so that the collection will be thorough and complete A useful scholarly index has been prepared especially for this volume *Celebrating Irving Fisher* Robert W. Dimand, 2005 *Irving Fisher* Robert W. Dimand, 2019-03-29 Acclaimed by Joseph Schumpeter as The greatest economist the United States has ever produced this book examines the life and work of American economist and statistician Irving Fisher 1867 1947 Fisher's reputation suffered for decades after his incorrect predictions for the stock market in October 1929 and the impact of Keynesian macroeconomics but the importance of his work came to be recognized through the advocacy of many prestigious scholars including Milton Friedman Hyman Minsky and James Tobin With pivotal contributions including his Debt Deflation Theory Fisher Diagram and Ideal Index Number his research in neoclassical economics influenced policymaking in his own day as well as during the recent financial crisis This volume will be of interest to all those interested in the twentieth century transformation of economics *Henry George's Legacy in Economic Thought* John Laurent, 2005-01-01 Henry George's Legacy in Economic Thought will appeal in particular to upper level students and scholars of the history of economic thought and the public sector but also to economists more widely *A Worker's Economist* John Dennis Chasse, 2017-07-12 John R

Commons is one of the few reformers of the past century whose major works are still actively read whose ideas are still debated and whose principles are still applied to the analysis of contemporary problems His life spanned the years of America's Great Transformation from a nation of shopkeepers farmers and small towns to one of giant corporations landless laborers and crowded cities He became involved in almost every aspect of America's response to the damaging side effects of that transformation *A Worker's Economist* begins with John Commons childhood and education and continues through his life as a scholar teacher administrator and reformer Commons list of accomplishments are great in number and overall effect He worked on the staff of the first government commission to investigate the economic and social consequences of corporate mergers He served as a public representative on the commission that investigated industrial violence and workplace relations He was a participant observer in America's largest and most historic miners strike He wrote and administered the nation's first constitutional worker compensation law He developed principles of social reform and public administration that his students carried into the design and administration of the Social Security system as well as Lyndon B Johnson's War on Poverty John Dennis Chasse reviews Commons major works describes the people with whom he worked and follows the fortunes of the unions that were intrinsic to his vision of collective democracy As a final testament to Commons importance Chasse considers his legacy as it endures in the work of his students and beyond **The Life**

Cyclists C. The 7 Most Important Equations for Your Retirement Moshe A. Milevsky, 2012-05-14 The 800 years of scientific breakthroughs that will help salvage your retirement plans Physics Chemistry Astronomy Biology every field has its intellectual giants who made breakthrough discoveries that changed the course of history What about the topic of retirement planning Is it a science Or is retirement income planning just a collection of rules of thumb financial products and sales pitches In *The 7 Most Important Equations for Your Retirement* And the Stories Behind Them Moshe Milevsky argues that twenty first century retirement income planning is indeed a science and has its foundations in the work of great sages who made conceptual and controversial breakthroughs over the last eight centuries In the book Milevsky highlights the work of seven scholars summarized by seven equations who shaped all modern retirement calculations He tells the stories of Leonardo Fibonacci the Italian businessman Benjamin Gompertz the gentleman actuary Edmund Halley the astronomer Irving Fisher the stock jock Paul Samuelson the economic guru Solomon Heubner the insurance and marketing visionary and Andrey Kolmogorov the Russian mathematical genius all giants in their respective fields who collectively laid the foundations for modern retirement income planning With baby boomers starting to hit retirement age planning for retirement income has become a hot topic across the country Author Moshe Milevsky is an internationally respected financial expert with the

knowledge you need to assess whether you are ready to retire or not Presents an entertaining informative narrative approach to financial planning Understanding the ideas behind these seven foundation equations which Moshe Milevsky explains in a manner that everyone can appreciate will help baby boomers better prepare for retirement This is a book unlike anything you have ever read on retirement planning Think Suze Orman meets Stephen Hawking If you ever wondered what the point of all that high school mathematics was Moshe Milevsky's answer is So that you can figure out how to retire while you can still enjoy your money

Histories of Productivity Peter-Paul Bänziger, Mischa Suter, 2016-07-15 Global issues such as climate change and the aftermath of the 2008 financial crisis have spurred interest in thinking about the history of the modern economy that goes beyond disciplinary economic history This book contributes to the cultural history of capitalism and its different regimes of productivity by pursuing the perspective of body history and by providing a global scope Throughout modernity the body served as a fundamental albeit essentially changing linchpin for both the organization of economic practices and for intellectual reflections on the economy In particular it was the pivotal interface to render notions of economic productivity intelligible The book explores this central thesis in a range of case studies drawing on source material from West Africa Europe Mexico and the US Framed by a theoretically informed introduction which also provides a conceptual history of notions of productivity and by an afterword that brings the approaches explored in this volume into dialogue with scholarship inspired by Marx and Foucault the individual chapters tackle the concept of productivity from a wide array of angles each illuminating the promises and problems of a cultural take on the history of economic productivity

Creating The "Big Mess": A Marxist History Of American Accounting Theory, C.1900-1929 Rob Bryer, 2021-07-15 Creating the Big Mess and its sequel Accounting for Crises use Marx's theory of capitalism to explain why there is no generally accepted theory of financial accounting and explore the consequences by studying the history of American accounting theory from c 1900 to 2007 The answer Creating the Big Mess is first that while late 19th century British accounting principles founded on the going concern concept provided an objective basis for holding management accountable to shareholders for its stewardship of capital and were accepted by the nascent American profession they are inchoate Second Irving Fisher's economic theory of accounting based on the assertion that present value is the accountants measurement ideal which is subjective framed early 20th century American accounting theory which undermined British principles making them incoherent In an unregulated pro business environment leading theorists particularly Henry Rand Hatfield and William A Paton Jr became authorities for management discretion creating the big mess Hatfield saw in late 1920s American accounting Accounting for Crises examines the roles of Fisher's theory in promoting the speculation leading to the 1929 Great Crash aggravating the Great Depression hindering accounting regulation from the 1930s producing the Financial Accounting Standard Board's conceptual framework and facilitating the 2007 2008 Global Financial Crisis
