The standards a translator has to meet these days are high and it is therefore hard to take as a coincidence that The Great Gatsby Scott Fitzgerald's most famous work has been translated into German three times up to now. This remarkable number of translations for a book written not even a century ago might have something to do with the expectations the translator has to satisfy and which tend to be quite exalted when a lot of readers who are not familiar with the language of the original work and many publishers who are aware of the fact that the translated work often sells better than the original await its translation eagerly. Once the translation is published the question of the authenticity of how much of the author the translated book still contains is a common problem especially in the critique and the feuilleton but also among a book's major recipients the common readers. Everybody that ever had the chance to have a thorough talk with a foreigner about a literary work known to both sides might have come across the phenomenon that certain aspects of that book were perceived in different ways maybe the irony of a main character suddenly bordered sarcasm maybe his felicitous language did not sound eloquent at all or maybe the character's whole appearance was bathed in a slightly different light. The aim of this term paper is to analyse if there are such differences between two versions of The Great Gatsby furthermore if and to which extent they can influence the perception of a character and finally to analyse how such aberrations can come into existence. **F. Scott Fitzgerald's The Great Gatsby** Matthew Joseph Bruccoli, 2000 The Great Gatsby is regarded as the most widely taught and read American literary classic. This volume is intended to help readers fully enjoy and understand this work that continues to become part of the equipment of educated people. Also provides information on the author's intentions in writing this work and the knowledge values standards and biases of the public at the time of its initial publication. **Grammaticalization Paths of English and High German Existential Constructions** Simone E. Pfenninger, 2009 Existential constructions are a fundamental feature of many Indo-European languages and constructions with non-referential subjects have developed in all of the latter albeit at different stages in their histories. High German does not feature a prototypical existential construction that is equivalent in syntactic and pragmatic function and semantic meaning to the English existential there construction. How did a prototypical existential structure originate in English? Why is it that High German has never developed such a construction? Has it ever shown a tendency towards developing one? How did two closely related languages such as English and High German come to differ so much with respect to these constructions? By means of investigating a variety of historical and contemporary data this study shows that not only semantic pragmatic and syntactic factors are involved which decide the choice of a certain construction but also very much the more general different linguistic development that the two languages underwent in the course of time.
