Derivative Spectrophotometry and PAM-Fluorescence in Comparative Biochemistry Vladimir S.

Saakov, Alexander I. Krivchenko, Eugene V. Rozengart, Irina G. Danilova, 2015-12-09 This book presents various examples of how advanced fluorescence and spectroscopic analytical methods can be used in combination with computer data processing to address different biochemical questions The main focus is on evolutionary biochemistry and the description of biochemical and metabolic issues specifically the use of pulse amplitude modulated fluorescence PAM for the functional analysis of the cellular state as well as results obtained by means of the derivative spectroscopy method characterizing structural reorganization of a cell under the influence of external factors are discussed The topics presented here will be of interest to biologists geneticists biophysicists and biochemists as well as experts in analytical chemistry pharmaceutical chemistry and radio chemistry and radio activation studies with protons and alpha particles It also offers a valuable resource for advanced undergraduate and graduate students in biological physical and chemical disciplines whose work involves derivative spectrophotometry and PAM fluorescence

Derivative Spectroscopy Joseph Dubrovkin, 2020-12-23 This book will appeal to both practitioners and researchers in both industrial and university chemical bio pharmaceutical and physical analytical laboratories and students specializing in analytical spectroscopy bio pharmaceutical analysis chemometrics and laser physics It sums up the results of more than half a century of research in derivative spectroscopy including numerical differentiation and optical modulation techniques The bibliography also briefly describes hundreds of derivative spectroscopic classic optical and laser and non spectroscopic chromatography electrochemistry and other methods in industrial and research laboratories This book differs from existing studies on the subject in that it offers for the first time the big picture of all kinds of spectroscopic and non spectroscopic derivative methods Also the book provides quickly reproducible computer calculations illustrating its significant theoretical statements As such it can also serve as a practical guide to lecturers in analytical chemistry chemometrics and spectroscopy

Recent Advances in Natural Products Analysis Seyed Mohammad Nabavi, Mina Saeedi, Seyed Fazel Nabavi, Ana Teresa Sanches Silva, 2020-03-07 Recent Advances in Natural Products Analysis is a thorough guide to the latest analytical methods used for identifying and studying bioactive phytochemicals and other natural products Chemical compounds such as flavonoids alkaloids carotenoids and saponins are examined highlighting the many techniques for studying their properties Each chapter is devoted to a compound category beginning with the underlying chemical properties of the main components followed by techniques of extraction purification and fractionation and then techniques of identification and quantification Biological activities possible interactions levels found in plants the effects of processing and current and potential industrial applications are also included Focuses on the latest analytical techniques used for studying phytochemical and other biological compounds Authored and edited by the top worldwide experts in their field Discusses the current and potential applications and predicts future trends of each compound group
