**Dermal Absorption Models in Toxicology and Pharmacology** Jim E. Riviere, Nancy A. Monteiro-Riviere, 2005-08-24 Many experimental methods and mathematical modeling approaches rooted in disciplines outside of toxicology can be effectively applied to estimating dermal absorption Dermal Absorption Models in Toxicology and Pharmacology explores current approaches and techniques that can be used to quantify dermal absorption with endpoints useful in both toxicology and pharmacology The book begins with a review of basic principles and the in vitro and in vivo experimental approaches available for assessing dermal absorption of drugs and chemicals This is followed by coverage of mathematical or in silico models for quantitating percutaneous absorption and the applications of these techniques to the risk assessment process The remainder of the book explores scenarios where the unique properties of the chemicals being studied or the matrix in which they are exposed must be considered and then wraps up with a comparative analysis of chemical permeability in human and animal skin Many of the books covering this subject are just too comprehensive and serve primarily as reference works This book takes a different approach Jim Riviere's editorial guidance ensures that the information is readable accessible authoritative and concise making it the perfect resource for familiarizing new researchers and students to the field and updating established scientists Dermal Absorption Models in Toxicology and Pharmacology, Second Edition Jim E. international experts in the field of skin biology the book presents the central role of the skin barrier to health and disease reviewing The skin s anatomy and physiology with focus on the stratum corneum as a barrier to foreign substances Dermal absorption cutaneous metabolism and epidermal transporters Altered barriers racial skin types aged skin photoaged skin cosmetics and skin sensitization Modern approaches to drug delivery across the skin barrier including liposomes microneedle technology active and passive transdermal delivery Examples and case studies of chemical toxicity after topical exposures ranging from arsenic metal working fluids bromine jet fuel sulfur mustard and including the emerging area of nanomaterial penetration Toxicology of the Skin is essential reading for drug delivery pharmacologist formulation scientists dermatologists toxicologists molecular biologists engineers surgeons students and anyone interested in skin irritation and skin absorption
