Practical Astigmatism Noel Alpins, 2024-06-01

The surgical correction of astigmatism is the last frontier to optimizing visual outcomes for patients. Practical Astigmatism Planning and Analysis is a comprehensive guide to correcting astigmatism from pre-operative planning to post-operative analysis. This provides readers with unique insight to what actually happened surgically: did the astigmatism over or under correct? Was it on axis or off axis? With this book ophthalmologists will be able to analyze previous procedures with the appropriate nomograms and more often achieve targeted outcomes. Dr Noel Alpins has developed the Alpins Method of astigmatism to provide accurate planning and analysis of astigmatism procedures. His method focuses on analyzing refractive and corneal astigmatism parameters and using the results in future surgery to improve visual outcomes. The importance of the ocular residual astigmatism (ORA) is detailed when planning astigmatism surgery. Practical Astigmatism features vector planning for refractive laser surgery as well as planning and analysis applied to cataract and limbal relaxing incisions in addition to demonstrating graphical analysis of astigmatism using high quality vector and fan diagrams as used in scientific journals. In addition, hemidivisional analysis of the irregular cornea, corneal coupling in incisional and excimer laser surgery for mixed astigmatism and toric IOL planning with total corneal power using corneal topographic astigmatism (CorT) total are addressed as well.

Some Questions Answered Inside: What is the difference between regular and irregular astigmatism? How do I diagnose each and how does this affect my surgical technique? Can I incorporate corneal astigmatism when performing excimer laser surgery? Why are my LRIs undercorrecting the astigmatism? Is it safe to perform excimer laser on keratoconus patients? Which corneal astigmatism measure do I choose and what do I do following a refractive surprise?

Practical Astigmatism Planning and Analysis will help ophthalmologists, optometrists and technicians alike address each patient's unique circumstances and act as your in-depth guide to correcting astigmatism.

Testimonials: For more than three decades I have been listening to, arguing with and admiring the work of Dr Noel Alpins in the field of astigmatism. Despite his remote location on the small island of Australia, his knowledge of astigmatism is at the peak of Mt Everest. There are few others who

have devoted their careers to understanding and managing astigmatism for which the world of ophthalmology is truly grateful Robert H Osher MD Noel is an original thinker who took on and conquered the complexities of astigmatism analysis publishing the seminal papers on the way His work has formed the cornerstone from which our current understanding and management of astigmatism has been built He is someone from whom we have all learnt a great deal and this book is a testament to this Dan Z Reinstei MD MA Cantab FRCS DABO FRCOphth FEBO
