Defense Strategy For The Post Saddam Era:

Defense Strategy for the Post-Saddam Era Michael E. O'Hanlon, 2005-09-01 The Brookings Institution has long produced an analysis of America's defense budgets and policies. The war on terror and the ongoing operations in Iraq and Afghanistan have forced upon this country soaring defense budgets and unprecedented challenges in policymaking. In the newest installment in this tradition leading foreign policy expert Michael O'Hanlon offers policy recommendations for strengthening the ability of America's military to respond to international crises in a tumultuous world. The United States can for the foreseeable future be confident that its armed forces will remain engaged in Iraq as well as in Afghanistan and other theaters in the war on terror. It will also need to remain involved in deterrence missions in the western Pacific, most notably in Korea and the Taiwan Strait. It will wish to remain engaged in European security since the capabilities and cohesion of the NATO alliance have important implications for the United States globally. O'Hanlon reviews these priorities, asking tough questions and developing frameworks for answering them. What military will the United States need in the future? How much will it cost? How can the U.S. increase the size of its ground forces without increasing the size of the defense budget? In an era of apocalyptic terror threats and at a time of 400 billion defense budgets and 400 billion federal budget deficits, how can this country protect its citizens while maintaining fiscal responsibility?

Defense Strategy for the Post-Saddam Era Michael E. O'Hanlon, 2005-03-29 O'Hanlon also addresses the important question of how the United States might encourage and help other countries to share more of the global military burden in areas such as Africa. Finally, he sketches several possible new conflict scenarios that could occupy the American military or at least its force planners in the years and decades ahead. **BOOK JACKET** **Military Intelligence Professional Bulletin**, 2005 Military Modernization in an Era of Uncertainty

National Bureau of Asian Research (U.S.), 2005 Focuses on the defense capabilities of key Asian powers in the context of their grand strategies. Through a combination of country, regional, and topical studies, the book assesses how Asian states are modernizing their military programs in response to China's rise as a regional power, the war on terrorism, changes in U.S. force posture, the revolution in military affairs, and local security dilemmas. In addition to this central theme, each chapter examines the changing balance of power in Asia and identifies likely threats and opportunities that may arise in the next five years. **Expert Assessments on the Afghan National Security Forces**

United States. Congress. House. Committee on Armed Services. Oversight and Investigations Subcommittee, 2012 Adapting to Win Noriyuki Katagiri, 2015 When insurgent groups challenge powerful states, defeat is not always inevitable. Increasingly, guerrilla forces have overcome enormous disadvantages and succeeded in extending the period of violent conflict, raising the costs of war and occasionally winning. Noriyuki Katagiri investigates the circumstances and tactics that allow some insurgencies to succeed in wars against foreign governments while others fail. Adapting to Win examines almost 150 instances of violent insurgencies pitted against state powers, including in-depth case studies of the war in Afghanistan and the 2003 Iraq war. By applying sequencing theory

Katagiri provides insights into guerrilla operations ranging from Somalia to Benin and Indochina demonstrating how some insurgents learn and change in response to shifting circumstances Ultimately his research shows that successful insurgent groups have evolved into mature armed forces and then demonstrates what evolutionary paths are likely to be successful or unsuccessful for those organizations Adapting to Win will interest scholars of international relations security studies and third world politics and contains implications for government officials military officers and strategic thinkers around the globe as they grapple with how to cope with tenacious and violent insurgent organizations

The Wounded Giant Michael O'Hanlon, 2011-11-15 A farseeing and controversial analysis of the military America needs and the military we can afford from the director of research at Brookings As total federal debt trends toward 100 percent of the GDP and America wavers on the edge of another recession Congress has responded with a plan for deficit reduction more than two trillion dollars over ten years But its plan emphasizes some parts of the federal budget over others Entitlements are likely to be spared and tax reform deferred Defense spending however could be cut by as much as one trillion dollars over a decade above and beyond savings from ending current wars This Michael O Hanlon argues isn't just unwise it is potentially catastrophic Such a prospect demands that we have a serious conversation about our national security priorities in an age of austerity Deep cuts to the U S military would make for brutal politics in any ordinary time and this is no ordinary time our government is rife with partisan enmity and 2012 promises to be one of the most heated presidential election campaigns in our history THE WOUNDED GIANT asks us to take a deep breath and think clearly and deeply about our national security and about our role in the world O Hanlon forcefully reminds us that it's not a question of how much we want to pay for our military but how much we need to pay O Hanlon's command of the whole vast range of American military spending past and present is rare as is his grasp of the strategic logic of our military's gigantic footprint O Hanlon tests his proposals through a series of chilling plausible scenarios What would happen if North Korea detonated a nuclear bomb If the Pakistani government fell If China turned militant His conclusions are challenging and impossible to dismiss easily Through tougher management changes in military compensation policies a selective reduction in the number of ground air and naval forces as well as smart and selective modernization efforts and technological advancements O Hanlon argues we can reduce our defense budget without untenable risk to our military and our country as long as cuts over the next ten years do not exceed half a trillion dollars None of the choices is easy these recommendations will be controversial all involve the goading of a cherished sacred cow in someone's view But the heated debate THE WOUNDED GIANT will spark is a necessary one and the sooner we have it the better

Hard Power Kurt Campbell, Michael O'Hanlon, 2007-03-09 Our ideas about national security have changed radically over the last five years It has become a political tool a wedge issue a symbol of pride and fear It is also the one issue above all others that can make or break an election And this is why the Democratic Party has been steadily losing power since 2001 In Hard Power Michael O Hanlon an expert on foreign policy at the Brookings Institution and Kurt Campbell an

authority on international security at the Center for Strategic and International Studies explain how the Democrats lost credibility on issues of security and foreign policy how they can get it back and why they must They recall the successful Democratic military legacy of past decades as well as recent Democratic innovations like the Homeland Security Office and the idea of nation building that have been successfully co opted by the Republican administration And most importantly they develop a broad national security vision for America including specific defense policies and a strategy to win the war on terror

The War on Terrorism Stephen Gale, 2017-07-28 On September 11 2001 a small number of desperate men hoping to earn paradise attacked New York and Washington D C Their spectacular acts of destruction concluded America's nearly decade long vacation from insecurity known as the post Cold War era As eras go this one was short and it certainly ended with a bang not a whimper The United States still sole superpower was now challenged by a bleak new world Americans do not care for the bleak and do not tolerate it for long Predictably national shock soon became righteous anger coupled to international campaigns against groups and states held responsible for the scourge of terrorism These were short term measures that hurt our enemies but did not fix the problem Not long after these events the Foreign Policy Research Institute organized a new Center on Terrorism Counterterrorism and Homeland Security Its purpose was to take a longer term view of the terrorism problem and what might be done about it not only academic research but also policy suggestions This book contains a broad selection of the Center's output including essays on American strategy homeland security knowing the enemy and the military dimension A notable feature is the discussion of the educational issue what and how to teach our children about terrorism

The New Global Insecurity Fathali M. Moghaddam, 2010-01-22 A noted conflict expert shows how accelerating globalization is causing dangerous global insecurity that must be met by new security models and policies The New Global Insecurity How Terrorism Environmental Collapse Economic Inequalities and Resource Shortages Are Changing Our World explores insecurity arising out of accelerating globalization In this unique and forward thinking work psychologist Fathali M Moghaddam director of the Conflict Studies Program at Georgetown University explains how and why worldwide insecurity is rising and what steps we must take to quell or reverse that insecurity to make the future of the world more peaceful The book first analyzes the elements and roots of global insecurity discussing it in relation to terrorism torture economic instability threatened identity and religious fundamentalism It then puts forward a new model for understanding security wherein soft security capital serves as the enabling condition for hard security capital Finally the current policies for managing diversity multiculturalism and assimilation are both rejected in favor of an exciting new policy omniculturalism Drawing on his years of study and expertise Moghaddam likewise proposes a new policy for better managing intergroup relations in an insecure age
