COAL

A Human History

BARBARA FREESE

Coal A Human History

Benjamin Reilly

Coal A Human History:

Coal Barbara Freese, 2006 Coal has transformed societies and shaped the fate of nations It launched empires and triggered wars Above all it fuelled the Industrial Revolution in Britain propelling the rise of a small rural kingdom into the greatest commercial empire in the world Taking us on a rich historical journey that begins on the banks of the river Tyne Barbara Freese explores the profound role coal has played in human history and continues to play in today's world The first half of the book is set in Britain and tells how coal transformed Britain and ushered in the industrial age The rest of the book looks at America and China at the birth of the unions and the closing of the mines and at the energy industry today With oil prices on the rise and no end in sight to our insatiable appetite for energy the world is turning again to coal **Coal** Barbara Freese, 2005 The Romans called it the best stone in Britain and used it to make jewellery Coal has transformed societies and launched empires It fuelled the industrial revolution inspired the Communist manifesto and was a catalyst for some of the greatest inventions of all time from the steam engine to the railroad Taking us on a rich historical journey that begins hundreds of years ago on the banks of the River Tyne and spanned the globe Barbara Freese shows us the profound and often surprising role coal has played in human history A gifted and lively storyteller Barbara Freese tells the riveting story of how a shiny black lump changed the modern world *Coal* Barbara Freese, 2003-01-07 Prized as the best stone in Britain by Roman invaders who carved jewelry out of it coal has transformed societies powered navies fueled economies and expanded frontiers It made China a twelfth century superpower inspired the writing of the Communist Manifesto and helped the northern states win the American Civil War Yet the mundane mineral that built our global economy and even today powers our electrical plants has also caused death disease and environmental destruction As early as 1306 King Edward I tried to ban coal unsuccessfully because its smoke became so obnoxious Its recent identification as a primary cause of global warming has made it a cause célèbre of a new kind In this remarkable book Barbara Freese takes us on a rich historical journey that begins three hundred million years ago and spans the globe From the Great Stinking Fogs of London to the rat infested coal mines of Pennsylvania from the impoverished slums of Manchester to the toxic city streets of Beijing Coal is a captivating narrative about an ordinary substance that has done extraordinary things a simple black rock that could well determine our fate as a species **Cost of Coal in Human History**, 1937 **The Human Story of Coal** George Holmes Cushing, 1924 **Energy** Richard Rhodes, 2019-06-11 A meticulously researched The New York Times Book Review examination of energy transitions over time and an exploration of the current challenges presented by global warming a surging world population and renewable energy from Pulitzer Prize and National Book Award winning author Richard Rhodes People have lived and died businesses have prospered and failed and nations have risen to world power and declined all over energy challenges Through an unforgettable cast of characters Pulitzer Prize winning author Richard Rhodes explains how wood gave way to coal and coal made room for oil as we now turn to natural gas nuclear power and renewable

energy Entertaining and informative a powerful look at the importance of science NPR org Rhodes looks back on five centuries of progress through such influential figures as Queen Elizabeth I King James I Benjamin Franklin Herman Melville John D Rockefeller and Henry Ford In his magisterial history a tour de force of popular science Kirkus Reviews starred review Rhodes shows how breakthroughs in energy production occurred from animal and waterpower to the steam engine from internal combustion to the electric motor He looks at the current energy landscape with a focus on how wind energy is competing for dominance with cast supplies of coal and natural gas He also addresses the specter of global warming and a population hurtling towards ten billion by 2100 Human beings have confronted the problem of how to draw energy from raw material since the beginning of time Each invention each discovery each adaptation brought further challenges and through such transformations we arrived at where we are today A beautifully written often inspiring saga of ingenuity and progress Energy brings facts context and clarity to a key often contentious subject Booklist starred review THE EMERGENCE AND NATURE OF HUMAN HISTORY Volume One Joseph Miller,2012-07-29 This book attempts to define the issues that face us in trying to understand the often overwhelming complexity of the human experience It is intellectually challenging broad in its scope richly detailed and densely argued It is the first in a projected series of five volumes in which the author will seek to touch on every aspect of human historical reality and all the multitudinous variables that have shaped it **The History of the World in 100 Plants** Simon Barnes,2022-10-27 From the author of The History of the World in 100 Animals a BBC Radio Four Book of the Week comes an inspirational new book that looks at the 100 plants that have had the greatest impact on humanity stunningly illustrated throughout As humans we hold the planet in the palms of our hands But we still consume the energy of the sun in the form of food The sun is available for consumption because of plants Plants make food from the sun by the process of photosynthesis nothing else in the world can do this We eat plants or we do so at second hand by eating the eaters of plants Plants give us food Plants take in carbon dioxide and push out oxygen they give us the air we breathe direct the rain that falls and moderate the climate Plants also give us shelter beauty comfort meaning buildings boats containers musical instruments medicines and religious symbols We use flowers for love we use flowers for death The fossils of plants power our industries and our transport Across history we have used plants to store knowledge to kill to fuel wars to change our state of consciousness to indicate our status The first gun was a plant we got fire from plants we have enslaved people for the sake of plants We humans like to see ourselves as a species that has risen above the animal kingdom doing what we will with the world But we couldn't live for a day without plants Our past is all about plants our present is all tied up with plants and without plants there is no future From the mighty oak to algae from cotton to coca here are a hundred reasons why *Climate Change in Human History* Benjamin Lieberman,Elizabeth Gordon,2021-12-02 Climate Change and Human History provides a concise introduction to the relationship between human beings and climate change throughout history Starting hundreds of thousands of years ago and going up to the present day this book illustrates how natural climate

variability affected early human societies and how human activity is now leading to drastic changes to our climate Taking a chronological approach the authors explain how climate change created opportunities and challenges for human societies in each major time period covering themes such as phases of climate and history climate shocks the rise and fall of civilizations industrialization accelerating climate change and our future outlook This 2nd edition includes a new chapter on the explosion of social movements protest groups and key individuals since 2017 and the implications this has had on the history of climate change an improved introduction to the Anthropocene and extra content on the basic dynamics of the climate system alongside updated historiography With more case studies images and individuals throughout the text the second edition also includes a glossary of terms and further reading to aid students in understanding this interdisciplinary subject An ideal companion for all students of environmental history Climate Change and Human History clearly demonstrates the critical role of climate in shaping human history and of the experience of humans in both adapting to and shaping climate change

Disaster and Human History Benjamin Reilly, 2022-05-13 Human history is periodically punctuated by natural disasters from Vesuvius eruption to the modern day Covid 19 pandemic Volcanoes have buried entire cities earthquakes have reduced structures to smoldering ruins Floods and cyclones have wreaked havoc on river valleys and coastlines and desertification and climate change have weakened society's underpinnings Death tolls are often escalated by starvation and illness which frequently occur in tandem This second edition assesses natural disasters on human society and the effect of strategies developed to reduce their impact This book addresses the interconnectivity of disaster and human responsibility through 23 updated case studies including a new chapter on the 2011 T hoku tsunami and the ensuing Fukushima nuclear disaster
