Cosmic Bullets High Energy Particles In Astrophysics Frontiers Of Science:

Cosmic Bullets Roger Clay, Bruce Dawson, 1999-04-23 The first complete book on one of the oldest cosmic mysteries

Cosmic Bullets Roger Clay, Bruce Dawson, 1998-05-10 In 1992 the fastest object known to mankind hit the Earth's atmosphere at a speed within a billion trillionth of one percent of the speed of light carrying an energy far above that of the most powerful particle accelerator ever built That object was a cosmic ray *Cosmic Bullets* tells the incredible story of the discovery and study of these messengers from space **Topics in Cosmic-ray Astrophysics** Michael DuVernois, 1999

Presents recent findings on charged cosmic rays primarily nuclei from galactic and extra galactic sources Chapters on new and proposed instruments and techniques examine projects such as the SilEye and the PAMELA apparatus for the search of antimatter in cosmic rays Papers on cosmic ray models look at nonlinear phenomena in diffusive shock acceleration and propagation of cosmic rays in the galaxy Material on cosmic ray sources and ultra high energy cosmic rays examine source composition and its relation to the interstellar matter and cosmic ray mass composition at highest energies The editor is a researcher at Pennsylvania State University Annotation copyrighted by Book News Inc Portland OR [Ripples On A Cosmic Sea](#) David G. entirely new window on the universe **Irreversible Time Physics** Igor Taganov, 2020-03-06 In modern science including theoretical physics as in the early classical mechanics the unnatural reversible time of Newton based on the medieval concept of geometric time by Nicholas Oresme is still used This original sin of natural sciences has unintended consequences and creates a set of paradoxes and methodological problems for science The book explores two new models of essentially irreversible time decelerating cosmological time and irreversible discrete time of a microcosm It discusses recent astronomical observations that reveal evidence of the cosmological deceleration of the pace of time in the distant cosmos in the solar system and on earth The structure of the model of irreversible discrete time of a microcosm as considered in the book allows for the existence of both time and anti time In particular the model predicts new uncertainty relations and violation of the mirror symmetry of the integral internal parity of the entire population of micro particles that correspond to current studies of elementary particle physics **Patterns In The Sand** Terry Bossomaier, David Green, 1998-09-14 A new vision of the most revolutionary scientific breakthrough of the twentieth century and beyond
