Developmental Theory And Clinical Process:

Developmental Theory and Clinical Process Fred Pine,1987 Developmental Theory and Clinical Process Fred Pine,1987-07-01 This treasurehouse of a book glows with contributions to every fundamental aspect of psychoanalysis Dr Pine moves with grace and authority between the worlds of child development and clinical process between abstract theory and the concrete methods and data of child observation and between classical psychoanalysis and the varieties of psychoanalytically oriented psychotherapy His well chosen clinical examples are models of sensitivity clarity and ingenuity Altogether a remarkable achievement and a must book for every psychoanalytic reader Roy Schafer **Drive, Ego, Object, And Self** Fred Pine,2008-08-01 In this important new book the noted theoretician Fred Pine provides a synthesis of the four conceptual domains of psychoanalysis drives ego functioning object relations and self experience He argues that a focus on the clinical phenomena themselves and not on the theoretical edifices built around them readily illuminates the inevitable integration of the several sets of phenomena in each person s unique psychological organization With superb clarity Pine shows how one or another or more of these becomes central to a particular individual s psychopathology Drawing on a wealth of detailed clinical material brief vignettes process notes of sessions and full analyses he vividly demonstrates how a broad multimodel perspective enhances the treatment process and is in fact its natural form He also applies these ideas to such crucial clinical issues as preoedipal pathology and ego defect the so called symbiotic phase and the mutative factors in treatment Conceptually elegant and immensely practical this highly original work is certain to be in the words of Arnold Cooper a guide for theorists and clinicians for many years to come **Handbook of Psychology, Clinical Psychology** George Stricker,Thomas A. Fairbairn's Object Relations Theory in the Clinical Setting David P. Celani, 2010-04-07 W R D Fairbairn 1889 1964 challenged the dominance of Freud's drive theory with a psychoanalytic theory based on the internalization of human relationships Fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental

neglect insensitivity and outright abuse that are impossible for the children to tolerate consciously. In Fairbairn's model, these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents. Attachment is paramount in Fairbairn's model as he recognized that children are absolutely and unconditionally dependent on their parents. Kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence. At the heart of Fairbairn's model is a structural theory that organizes actual relational events into three self and object pairs: one conscious pair, the central ego which relates exclusively to the ideal object in the external world; and two mostly unconscious pairs, the child's antilibidinal ego which relates exclusively to the rejecting parts of the object, and the child's libidinal ego which relates exclusively to the exciting parts of the object. The two dissociated self and object pairs remain in the unconscious but can emerge and suddenly take over the individual's central ego. When they emerge, the other is misperceived as either an exciting or a rejecting object, thus turning these internal structures into a source of transferences and reenactments. Fairbairn's central defense mechanism, splitting, is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego, a near-perfect model of the borderline personality disorder. In this book, David Celani reviews Fairbairn's five foundational papers and outlines their application in the clinical setting. He discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview. Incorporating decades of experience into his analysis, Celani emphasizes the internalization of the therapist as a new good object and devotes entire sections to the treatment of histrionic, obsessive, and borderline personality disorders.

Handbook of Attachment Jude Cassidy, Phillip R. Shaver, 1999. Pre-eminent authorities in the field cover the origins and development of attachment theory, biological attachment theory, biological perspectives, measurement of attachment across the lifespan, and emerging topics and perspectives.
