Inequality Reexamined Amartya Sen, 1995-03-15 The noted economist and philosopher Amartya Sen argues that the dictum all people are created equal serves largely to deflect attention from the fact that we differ in age gender talents and physical abilities as well as in material advantages and social background He argues for concentrating on higher and more basic values individual capabilities and freedom to achieve objectives By concentrating on the equity and efficiency of social arrangements in promoting freedoms and capabilities of individuals Sen adds an important new angle to arguments about such vital issues as gender inequalities welfare policies affirmative action and public provision of health care and education

Philosophical Letters of David K. Lewis David K. Lewis, 2020-10-29 David Kellogg Lewis 1913-2001 was one of the most influential philosophers of the twentieth century He made significant contributions to almost every area of analytic philosophy including metaphysics philosophy of language philosophy of mind and philosophy of science and set the agenda for various debates in these areas which carry on to this day In several respects he remains a contemporary figure yet enough time has now passed for historians of philosophy to begin to study his place in twentieth century thought His philosophy was constructed and refined not just through his published writing but also crucially through his life long correspondence with fellow philosophers including leading figures such as D M Armstrong Saul Kripke W V Quine J J C Smart and Peter van Inwagen His letters formed the undercurrent of his published work and became the medium through which he proposed many of his well known theories and discussed a range of philosophical topics in depth A selection of his vast correspondence over a 40 year period is presented here across two volumes As metaphysics is arguably where Lewis made his greatest contribution this forms the focus of Volume 1 Arranged under the broad areas of Causation Modality and Ontology the letters offer an organic story of the origins development breadth and depth of his metaphysics in its historical context as well as a glimpse into the influence of his many interlocutors This volume will be an indispensable resource for contemporary metaphysics and for those interested in the Lewisian perspective

Ethics and Humanity N. Ann Davis, Richard Keshen, Jeff McMahan, 2010-02-10 Ethics and Humanity pays tribute to Jonathan Glover a pioneering figure whose thought and personal influence have had a significant impact on applied philosophy In topics that include genetic engineering abortion euthanasia war and moral responsibility Glover has made seminal contributions The papers collected here written by some of the most distinguished contemporary moral philosophers address topics to which Glover has contributed with particular emphasis on problems of conflict discussed in his book *Humanity A Moral History of the Twentieth Century* There are also moving testimonials to the influence Glover has had on colleagues students and friends

Glover himself contributes a series of fine replies which constitute an important addition to his published work

Philosophical Letters of David K. Lewis David Kellogg Lewis, 2020 The life long correspondence of David K Lewis one of the most influential philosophers of the twentieth century reveals the development breadth and depth of his philosophy in its historical context The first of this two volume collection of letters focuses on his contributions to metaphysics arguably where he made his greatest impact Ethics, Reproduction and Genetic Control Ruth Chadwick, 2006-12-05 In this revised edition with a new preface from the editor leading scientists explain the nature and goals of test tube reproduction and genetic engineering and their eugenic implications In contrast to the Warnock report the extended commentary considers the issues in the context of a social ethic rather than the individualist viewpoint Reproductive Freedom, Torture and International Human Rights Ronli Sifris, 2013-12-13 This book contributes to a feminist understanding of international human rights by examining restrictions on reproductive freedom through the lens of the right to be free from torture and other cruel inhuman or degrading treatment Ronli Sifris challenges the view that torture only takes place within the traditional paradigm of interrogation punishment or intimidation of a detainee arguing that this traditional construction of the concept of torture prioritises the experiences of men over the experiences of women given that the pain and suffering from which women disproportionately suffer frequently occurs outside of this context She does this by conceptualising restrictions on women s reproductive freedom within the framework of the right to be free from torture The book considers the gendered nature of international law and the gender dimensions of the right to be free from torture It examines the extension of the prohibition of torture to encompass situations beyond the traditional detainee context in recent years to encompass situations such as rape and female genital mutilation It goes on to explore in detail whether denying access to abortion and involuntary sterilization constitutes torture or other cruel inhuman or degrading treatment under international law The book looks at whether limitations on reproductive freedom meet the determining criteria of torture which are severe pain or suffering being intentionally inflicted being based on discrimination linked in some way to a State official whether they constitute lawful sanctions and the importance of the concept of powerlessness In doing so the book also highlights how this right may be applicable to other gender based abuses including female genital mutilation and how this right may be universally applied to allow women worldwide the right to reproductive freedom **Mortal Thoughts** Brian Cummings, 2013-08-22 Since the nineteenth century it has been assumed that the concept of personal identity in the early modern period is bound up with secularization Indeed many explanations of the emergence of modernity have been based on this thesis in which Shakespeare as a secular author has played a central role However the idea of secularization is now everywhere under threat The secularity of modern society is less apparent than it was a generation ago Shakespeare too has come to be seen in a religious perspective What happens to human identity in this different framework Mortal Thoughts asks what selfhood looks like if we do not assume that an idea of the self could only come into being as a result of an emptying out of a religious framework It

does so by examining human mortality What it is to be human and how a life is framed by its ending are issues that cross religious confessions in early modernity and interrogate the sacred and secular divide A series of chapters examines literature and art in relation to concepts such as conscience martyrdom soliloquy luck suicide and embodiment Religious and philosophical creativity are revealed as poised around anxieties about finitude and contingency challenging conventional divisions between kinds of literary and artistic endeavour Mortal Thoughts considers incipient genres of life writing More Foxe and Montaigne and life drawing D rer Hans Baldung Grien in relation to dramatic representation and literary narration Shakespeare Donne Milton In the process it asks whether the problem of human identity rewrites historical boundaries
