literary history in general Instead of offering a traditional chronological narrative of the period 1800 1989 the History of the Literary Cultures of East Central Europe approaches the region s literatures from five complementary angles focusing on literature s participation in and reaction to key political events literary periods and genres the literatures of cities and sub regions literary institutions and figures of representation The main objective of the project is to challenge the self enclosure of national literatures in traditional literary histories to contextualize them in a regional perspective and to recover individual works writers and minority literatures that national histories have marginalized or ignored Types and stereotypes brings together articles that rethink the figures of National Poets figurations of the Family Women Outlaws and Others as well as figures of Trauma and Mediation As in the previous three volumes the historical and imaginary figures discussed here constantly change and readjust to new political and social conditions An Epilogue complements the basic history focusing on the contradictory transformations of East Central European literary cultures after 1989 This volume will be of interest to the region s literary historians to students and teachers of comparative literature to cultural historians and to the general public interested in exploring the literatures of a rich and resourceful cultural region Historical Dictionary of Leonard Bernstein
